This Statement of Additional Information (the "SAI") supplements the prospectus dated April 1, 2018, as it may be amended from time to time (the "Prospectus"), offering Institutional Shares of the CVR Dynamic Allocation Fund (the "Fund"), a separate series of Forum Funds II (the "Trust"). This SAI is not a prospectus and should only be read in conjunction with the Prospectus. You may obtain the Prospectus without charge by contacting Atlantic Fund Administration, LLC (d/b/a Atlantic Fund Services) ("Atlantic" or "Administrator") at the address, telephone number or e-mail address listed above. You may also obtain the Prospectus on the Adviser's website listed above. This SAI is incorporated by reference into the Fund's Prospectus. In other words, it is legally a part of the Prospectus.

Copies of the Fund's Annual Report may be obtained without charge and upon request, by contacting Atlantic at the address, telephone number or e-mail address listed above. You may also obtain copies of the Fund's most recent Annual Report and Semi-Annual Report on the Adviser's website listed above.

## KEY DEFINED TERMS

---

As used in this SAI, the following terms have the meanings listed.

“1933 Act” means the Securities Act of 1933, as amended, including rules, regulations, SEC interpretations, and any exemptive orders or interpretive relief promulgated thereunder.

“1940 Act” means the Investment Company Act of 1940, as amended, including rules, regulations, SEC interpretations, and any exemptive orders or interpretive relief promulgated thereunder.

“Adviser” means CVR Portfolio Funds LLC, the Fund’s investment adviser.

“Board” means the Board of Trustees of the Trust.

“CFTC” means the U.S. Commodity Futures Trading Commission.

“Independent Trustees” means trustees who are not interested persons of the Trust, as defined in Section 2(a)(19) of the 1940 Act.

“IRC” means the Internal Revenue Code of 1986, as amended.

“IRS” means the Internal Revenue Service.

“NAV” means net asset value per share.

“RIC” means a regulated investment company under Subchapter M of the IRC.

“SEC” means the U.S. Securities and Exchange Commission.

“Subadviser” means ROW Asset Management, LLC, the Fund’s subadviser.

## INVESTMENT POLICIES AND RISKS

---

The Fund is a diversified open-ended series of the Trust. This section supplements, and should be read in conjunction with, the Prospectus. Please see the Prospectus for a discussion of the Fund's investment objective, principal investment strategies and principal risks of investing in the Fund. That said, the following paragraphs provide more detail regarding the Fund's investment policies and the associated risks. Other than the principal investment strategies listed in the prospectus, the following strategies and instruments are non-principal strategies of the Fund.

### A. Equity Securities

**Common and Preferred Stock.** The Fund may invest in common and preferred stock. Common stock represents an ownership interest in a company and usually possesses voting rights and earns dividends. Dividends on common stock are not fixed but are declared at the discretion of the issuer. Common stock generally represents the riskiest investment in a company. In addition, common stock generally has the greatest appreciation and depreciation potential because increases and decreases in earnings are usually reflected in a company's common stock price. Preferred stock is a class of stock having a preference over common stock as to the payment of dividends or the recovery of investment should a company be liquidated, although preferred stock is usually junior to the debt securities of the issuer. Preferred stock typically does not possess voting rights. Preferred stock is subject to the risks associated with other types of equity securities, as well as additional risks, such as credit risk, interest rate risk, potentially greater volatility and risks related to deferral, non-cumulative dividends, subordination, liquidity, limited voting rights, and special redemption rights.

The fundamental risk of investing in common and preferred stock is the risk that the value of the stock might decrease. Stock values fluctuate in response to the activities of an individual company or in response to general market and/or economic conditions. Historically, common stocks have provided greater long-term returns and have entailed greater short-term risks than preferred stocks, fixed-income securities and money market investments. The market value of all securities, including common and preferred stocks, is based upon the market's perception of value and not necessarily the book value of an issuer or other objective measure of a company's worth. If you invest in the Fund, you should be willing to accept the risks of the stock market and should consider an investment in the Fund only as a part of your overall investment portfolio.

**Warrants.** The Fund may invest in warrants. Warrants are securities, typically issued with preferred stock or bonds that give the holder the right to purchase a given number of shares of common stock at a specified price and time. The price usually represents a premium over the applicable market value of the common stock at the time of the warrant's issuance. Warrants have no voting rights with respect to the common stock, receive no dividends and have no rights with respect to the assets of the issuer.

Investments in warrants involve certain risks, including the possible lack of a liquid market for the resale of the warrants, potential price fluctuations due to adverse market conditions or other factors and failure of the price of the common stock to rise. If the warrant is not exercised within the specified time period, it becomes worthless.

**Depositary Receipts.** The Fund may invest in sponsored and unsponsored American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs"), Global Depositary Receipts ("GDRs"), Holding Company Depositary Receipts ("HOLDRs"), New York Registered Shares ("NYRs") or American Depositary Shares ("ADSs"). ADRs typically are issued by a United States of America ("U.S.") bank or trust company, evidence ownership of underlying securities issued by a foreign company, and are designed for use in the U.S. securities markets. EDRs are issued by European financial institutions and typically trade in Europe and GDRs are issued by European financial institutions and typically trade in both Europe and the U.S. HOLDRs trade on the New York Stock Exchange ("NYSE") and are fixed baskets of U.S. or foreign stocks that give an investor an ownership interest in each of the underlying stocks. NYRs, also known as Guilder Shares since most of the issuing companies are Dutch, are dollar-denominated certificates issued by foreign companies specifically for the U.S. market. ADSs are shares issued under a deposit agreement that represents an underlying security in the issuer's home country. (An ADS is the actual share trading, while an ADR represents a bundle of ADSs.) The Fund may invest in ADRs in order to obtain exposure to foreign securities markets.

Unsponsored depositary receipts may be created without the participation of the foreign issuer. Holders of these receipts generally bear all the costs of the depositary receipt facility, whereas foreign issuers typically bear certain costs in a sponsored depositary receipt. The bank or trust company depositary of an unsponsored depositary receipt may be under no obligation to distribute shareholder communications received from the foreign issuer or to pass through voting rights. Accordingly, available information concerning the issuer may not be current, and the prices of unsponsored depositary receipts may be more volatile than the prices of sponsored depositary receipts. The securities underlying ADRs trade on

foreign exchanges at times when the U.S. markets are not open for trading. As a result, the value of ADRs representing those underlying securities may change materially at times when the U.S. markets are not open for trading.

## **B. Fixed-Income Securities**

**Security Ratings Information.** The Fund's investments in fixed-income, preferred stock and convertible securities are subject to the credit risk relating to the financial condition of the issuers of the securities. The Fund may invest in investment grade fixed-income securities and up to 5% of its total assets in non-investment grade fixed-income securities. Investment grade means rated in the top four long-term rating categories or unrated and determined by the Adviser to be of comparable quality. Non-investment grade fixed-income securities (commonly known as "junk bonds") have significant speculative characteristics and generally involve greater volatility of price than investment grade securities.

The lowest ratings that are investment grade for corporate bonds, including convertible securities, are "Baa" in the case of Moody's Investors Service, Inc. ("Moody's") and "BBB" in the cases of Standard & Poor's Financial Services, LLC, a division of the McGraw-Hill Companies, Inc. ("S&P") and Fitch, Inc. ("Fitch"); for preferred stock the lowest ratings are "Baa" in the case of Moody's and "BBB" in the cases of S&P and Fitch. The Fund may retain securities whose ratings have declined below the lowest permissible rating category (or that are unrated and determined by the Adviser to be of comparable quality to securities whose ratings have declined below the lowest permissible rating category) if the Adviser determines that retaining such security is in the best interests of the Fund. Unrated securities may not be as actively traded as rated securities.

Moody's, S&P, Fitch and other organizations provide ratings of the credit quality of debt obligations, including convertible securities. A description of the range of ratings assigned to various types of bonds and other securities is included in Appendix A to this SAI. The Adviser may use these ratings to determine whether to purchase, sell or hold a security. Ratings are general and are not absolute standards of quality. Credit ratings attempt to evaluate the safety of principal and interest payments and do not evaluate the risks of fluctuations in market value. An issuer's current financial condition may be better or worse than a rating indicates.

**Convertible Securities.** The Fund may invest in convertible securities. Convertible securities include fixed-income securities, preferred stock or other securities that may be converted into or exchanged for a given amount of common stock of the same or a different issuer during a specified period and at a specified price in the future. A convertible security entitles the holder to receive interest on debt or the dividend on preferred stock until the convertible security matures or is redeemed, converted or exchanged.

Convertible securities rank senior to common stock in a company's capital structure but are usually subordinated to comparable non-convertible securities. Convertible securities have unique investment characteristics in that they generally: (1) have higher yields than the underlying common stock, but lower yields than comparable non-convertible securities; (2) are less subject to fluctuation in value than the underlying common stock since they have fixed-income characteristics; and (3) provide the potential for capital appreciation if the market price of the underlying common stock increases.

A convertible security may be subject to redemption at the option of the issuer at a price established in the convertible security's governing instrument. If a convertible security is called for redemption, the Fund will be required to permit the issuer to redeem the security, convert it into the underlying common stock or sell it to a third party.

Investment in convertible securities generally entails less risk than an investment in the issuer's common stock. Convertible securities are typically issued by smaller capitalization companies whose stock price may be volatile. Therefore, the price of a convertible security may reflect variations in the price of the underlying common stock in a way that non-convertible debt does not. The extent to which such risk is reduced, however, depends in large measure upon the degree to which the convertible security sells above its value as a fixed-income security.

**Money Market Instruments and Other Securities.** The Fund may invest in U.S. dollar and non-U.S. dollar denominated money market instruments and similar securities, including debt obligations issued by the U.S. and foreign national, provincial, state or municipal governments or their political subdivisions. The Fund may also invest in (1) money market instruments and similar securities issued by international organizations designated or supported by governmental entities (e.g., the World Bank and the European Community); (2) non-dollar securities issued by the U.S. government; and (3) foreign corporations. Money market instruments in which The Fund may invest include short-term government securities, floating and variable rate notes, commercial paper, repurchase agreements, CDs, time deposits, bankers' acceptances, and other short-term liquid instruments.

**U.S. and Foreign Government Securities.** The Fund may invest in U.S. Government Securities. U.S. Government Securities include: (1) U.S. Treasury obligations (which differ only in their interest rates and maturities), (2) obligations issued or guaranteed by U.S. Government agencies and instrumentalities that are backed by the full faith and credit of the U.S. Government (such as securities issued by the Federal Housing Administration (“FHA”), Government National Mortgage Association (“GNMA”), the Department of Housing and Urban Development, the Export-Import Bank, the General Services Administration and the Maritime Administration and certain securities issued by the FHA and the Small Business Administration) and (3) securities that are guaranteed by agencies or instrumentalities of the U.S. Government but are not backed by the full faith and credit of the U.S. Government (such as the Federal National Mortgage Association (“Fannie Mae”), the Federal Home Loan Mortgage Corporation (“Freddie Mac”) or the Federal Home Loan Banks). These U.S. Government-sponsored entities, which although chartered and sponsored by Congress, are not guaranteed nor insured by the U.S. Government. They are supported by the credit of the issuing agency, instrumentality or corporation. The range of maturities of U.S. Government Securities is usually three months to thirty years. In general, the U.S. Government Securities tend to carry more interest rate risk than corporate bonds with similar maturities.

In September 2008, the U.S. Treasury and the Federal Housing Finance Agency (“FHFA”) announced that Fannie Mae and Freddie Mac had been placed in conservatorship. Since that time, Fannie Mae and Freddie Mac have received significant capital support through U.S. Treasury preferred stock purchases, as well as Treasury and Federal Reserve purchases of their mortgage-backed securities (“MBS”). The FHFA and the U.S. Treasury (through its agreement to purchase Freddie Mac and Fannie Mae preferred stock) have imposed strict limits on the size of their mortgage portfolios. The MBS purchase programs ended in 2010 and no assurance can be given that any Federal Reserve, U.S. Treasury, or FHFA initiatives will ensure that Freddie Mac and Fannie Mae will remain successful in meeting their obligations with respect to the debt and MBS they issue.

In addition, the problems faced by Fannie Mae and Freddie Mac, resulting in their being placed into federal conservatorship and receiving significant U.S. Government support, have sparked serious debate among federal policy makers regarding the continued role of the U.S. Government in providing liquidity for mortgage loans. The Obama Administration produced a report to Congress on February 11, 2011, outlining a proposal to wind down Fannie Mae and Freddie Mac by increasing their guarantee fees, reducing their conforming loan limits (the maximum amount of each loan they are authorized to purchase), and continuing progressive limits on the size of their investment portfolio. Serious discussions among policymakers continue, however, as to whether Freddie Mac and Fannie Mae should be nationalized, privatized, restructured, or eliminated altogether. Fannie Mae and Freddie Mac also are the subject of several continuing legal actions and investigations over certain accounting, disclosure or corporate governance matters, which (along with any resulting financial restatements) may continue to have an adverse effect on the guaranteeing entities. Importantly, the future of Freddie Mac and Fannie Mae is in serious question as the U.S. Government considers multiple options.

The Fund may also invest in separated or divided U.S. Government Securities. These instruments represent a single interest, or principal, payment on a U.S. Government Security that has been separated from all the other interest payments as well as the security itself. When the Fund purchases such an instrument, it purchases the right to receive a single payment of a set sum at a known date in the future. The interest rate on such an instrument is determined by the price the Fund pays for the instrument when it purchases the instrument at a discount under what the instrument entitles the Fund to receive when the instrument matures. The amount of the discount the Fund will receive will depend upon the length of time to maturity of the separated U.S. Government Security and prevailing market interest rates when the separated U.S. Government Security is purchased. Separated U.S. Government Securities can be considered zero coupon investments because no payment is made to the Fund until maturity. The market values of these securities are much more susceptible to change in market interest rates than income-producing securities. These securities are purchased with original issue discount and such discount is includable as gross income to the Fund shareholder over the life of the security.

The Fund may also purchase certificates not issued by the U.S. Department of the Treasury, which evidence ownership of future interest, principal or interest and principal payments on obligations issued by the U.S. Department of the Treasury. The actual U.S. Treasury securities will be held by a custodian on behalf of the certificate holder. These certificates are purchased with original issue discount and are subject to greater fluctuations in market value, based upon changes in market interest rates, than income-producing securities.

For purposes of the Fund’s concentration policies, the Fund does not consider foreign government securities to be part of any industry. Holders of U.S. Government and foreign securities not backed by the full faith and credit of the U.S. or foreign government must look principally to the agency or instrumentality issuing the obligation for repayment and may not be able to assert a claim against the U.S. or foreign government in the event that the agency or instrumentality does not meet its commitment. No assurance can be given that the U.S. Government or foreign government would provide support if it were

not obligated to do so by law. Neither the U.S. Government, foreign government nor any of its agencies or instrumentalities guarantees the market value of the securities they issue.

**Corporate Debt Obligations.** The Fund may invest in U.S. and foreign corporate debt obligations. Corporate debt obligations include corporate bonds, debentures, notes, commercial paper and other similar corporate debt instruments. Companies use these instruments to borrow money from investors. The issuer pays the investor a fixed or variable rate of interest and must repay the amount borrowed at maturity. Commercial paper (short-term unsecured promissory notes) is issued by companies to finance their current obligations and normally has a maturity of less than nine (9) months. In addition, The Fund also may invest in corporate debt securities registered and sold in the U.S. by foreign issuers (sometimes called Yankee bonds) and those sold outside the U.S. by foreign or U.S. issuers (sometimes called Eurobonds).

**Risks of Fixed-Income Securities.** Yields on fixed-income securities, including municipal securities, are dependent on a variety of factors, including the general conditions of the fixed-income securities markets, the size of a particular offering, the maturity of the obligation and the rating of the issue. Under normal conditions, fixed-income securities with longer maturities tend to offer higher yields and are generally subject to greater price movements than obligations with shorter maturities.

The issuers of debt securities are subject to the provisions of bankruptcy, insolvency and other laws affecting the rights and remedies of creditors that may restrict the ability of the issuer to pay, when due, the principal of and interest on its debt securities. The possibility exists therefore that, as a result of bankruptcy, litigation or other conditions, the ability of an issuer to pay, when due, the principal of and interest on its debt securities may become impaired.

**Interest Rates.** The market value of the interest-bearing fixed-income securities held by the Fund will be affected by changes in interest rates. There is normally an inverse relationship between the market value of securities sensitive to prevailing interest rates and actual changes in interest rates. The longer the remaining maturity and duration of a security, the more sensitive the security is to changes in interest rates. All fixed-income securities, including U.S. Government Securities, can change in value when there is a change in interest rates. Changes in the ability of an issuer to make payments of interest and principal and in the markets' perception of an issuer's creditworthiness will also affect the market value of that issuer's debt securities. As a result, an investment in the Fund is subject to risk, even if all fixed-income securities in the Fund's investment portfolio are paid in full at maturity. In addition, certain fixed-income securities may be subject to extension risk, which refers to the change in total return on a security resulting from an extension or abbreviation of the security's maturity.

Further, the current historically low interest rate environment was created in part by the Federal Reserve Board (FRB) and certain foreign central banks keeping the federal funds and equivalent foreign rates at or near zero. There is a risk that interest rates will rise when the FRB and central banks raise these rates. This risk is heightened due to the "tapering" of the FRB's quantitative easing program and other similar foreign central bank actions. This tapering and eventual increase in the federal funds and equivalent foreign rates may expose fixed income markets to heightened volatility and reduced liquidity for certain fixed income investments, particularly those with longer maturities. In addition, decreases in fixed income dealer market-making capacity may also potentially lead to heightened volatility and reduced liquidity in the fixed income markets. As a result, the value of the Fund's investments and share price may decline. Changes in central bank policies could also result in higher than normal shareholder redemptions, which could potentially increase portfolio turnover and the Fund's transaction costs.

**Credit.** The Fund's investments in fixed-income securities are subject to credit risk relating to the financial condition of the issuers of the securities that the Fund holds. The Fund may invest in high yield securities that provide poor protection for payment of principal and interest but may have greater potential for capital appreciation than do higher quality securities. These securities also have greater risk of default or price changes due to changes in the issuers' creditworthiness than do higher quality securities. The market for these securities may be thinner and less active than that for higher quality securities, which may affect the price at which the lower rated securities can be sold. In addition, the market prices of these securities may fluctuate more than the market prices of higher quality securities and may decline significantly in periods of general economic difficulty or rising interest rates. Under such conditions, the Fund may have to use subjective rather than objective criteria to value its high yield/high risk securities investments accurately and may rely more heavily on the judgment of the Adviser to do so.

Moody's, S&P and other organizations provide ratings of the credit quality of debt obligations, including convertible securities. See "Securities Ratings Information" above.

### C. Foreign Investments

The Fund may invest in foreign securities. Investments in the securities of foreign issuers may involve risks in addition to those normally associated with investments in the securities of U.S. issuers. All foreign investments are subject to risks of: (1) foreign political and economic instability; (2) adverse movements in foreign exchange rates; (3) the imposition or tightening of exchange controls or other limitations on repatriation of foreign capital; and (4) changes in foreign governmental attitudes toward private investment, including potential nationalization, increased taxation or confiscation of the Fund's assets.

In addition, dividends payable on foreign securities may be subject to foreign withholding taxes, thereby reducing the income available for distribution to you. Foreign brokerage commissions and custody fees are generally higher than those in the United States. Foreign accounting, auditing and financial reporting standards differ from those in the United States and therefore, less information may be available about foreign companies than is available about comparable U.S. companies. Foreign securities also may trade less frequently and with lower volume and may exhibit greater price volatility than U.S. securities.

Changes in foreign exchange rates will affect the U.S. dollar value of all foreign currency-denominated securities held by the Fund. Exchange rates are influenced generally by the forces of supply and demand in the foreign currency markets and by numerous other political and economic events occurring outside the United States, many of which may be difficult, if not impossible, to predict.

Income from foreign securities will be received and realized in foreign currencies and the Fund is required to compute and distribute income in U.S. dollars. Accordingly, a decline in the value of a particular foreign currency against the U.S. dollar after the Fund's income has been earned and computed in U.S. dollars may require the Fund to liquidate portfolio securities to acquire sufficient U.S. dollars to make a distribution. Similarly, if the exchange rate declines between the time the Fund incurs expenses in U.S. dollars and the time such expenses are paid, the Fund may be required to liquidate additional foreign securities to purchase the U.S. dollars required to meet such expenses.

The value of the Fund's investments may be affected by inflation, trade deficits, changes in interest rates, budget deficits and low savings rates, political factors and other factors. Trade deficits often cause inflation making a country's goods more expensive and less competitive thereby reducing the demand for that country's currency. High interest rates tend to increase currency values in the short-term by making such currencies attractive to investors; however, long-term results may be the opposite as high interest rates are often the product of high inflation. Political instability in a country can also cause a currency to depreciate if it appears that the country is inhospitable to business and foreign investment. In addition, various central banks may manipulate the exchange rate movements through their own buying and selling and can influence people's expectation with regard to the direction of exchange rates.

**Emerging Markets.** The value of the Fund's assets may be adversely affected by political, economic, social and religious instability; changes in laws or regulations of countries within emerging markets; international relations with other nations; and military activity. Furthermore, the economies of many emerging market countries may differ from the economies of more developed countries in many respects, such as rate of growth, inflation, capital reinvestment, resource self-sufficiency, financial system stability, the national balance of payment position, and sensitivity to changes in global trade. The governments of certain countries have placed restrictions on the operational freedom of private enterprise, and have or may nationalize private assets, including securities held by the Fund. Emerging market countries also have different accounting standards, corporate disclosure, governance and regulatory requirements than does the United States. As a result, there may be less publicly available information about securities in Asian countries. There is generally less governmental regulation of stock exchanges, brokers and issuers than in the United States, which may result in less transparency with respect to emerging market securities. The Fund may have difficulty obtaining or enforcing judgments against issuers of emerging market securities. Any adverse event in the emerging markets may have a significant adverse effect on the economies of the region as well as the Fund.

Investing in emerging markets involve greater risks than investing in more developed markets because, among other things, emerging markets are often less stable politically and economically. The economies of emerging market countries are smaller and less developed than that of the United States. Securities markets of such countries are substantially smaller, less liquid, and more volatile than securities markets in the United States. Brokerage commissions, custodian services fees, withholding taxes, and other costs relating to investment in emerging markets are generally higher than in the United States.

**Sovereign Debt Obligations.** The Fund may invest in, or have exposure to (through derivative instruments), sovereign debt obligations. Sovereign debt obligations are issued or guaranteed by a foreign government or one of its agencies, authorities,

instrumentalities or political subdivisions. Exposure to sovereign debt obligations involve special risks not present in corporate debt obligations. The issuer of the sovereign debt or the governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due, and the Fund or other holder of the sovereign debt may have limited recourse in the event of a default. During periods of economic uncertainty, the market prices of sovereign debt, and the Fund's net asset value, may be more volatile than prices of U.S. debt obligations. In the past, certain non-U.S. markets have encountered difficulties in servicing their debt obligations, withheld payments of principal and interest and declared moratoria on the payment of principal and interest on their sovereign debts.

A sovereign debtor's willingness or ability to repay principal and pay interest in a timely manner may be affected by, among other factors, its cash flow situation, the extent of its foreign currency reserves, the availability of sufficient foreign exchange, the relative size of the debt service burden, the sovereign debtor's policy toward principal international lenders and local political constraints. Sovereign debtors may also be dependent on expected disbursements from foreign governments, multilateral agencies and other entities to reduce principal and interest arrearages on their debt. The failure of a sovereign debtor to implement economic reforms, achieve specified levels of economic performance or repay principal or interest when due may result in the cancellation of third-party commitments to lend funds to the sovereign debtor, which may further impair such debtor's ability or willingness to service its debts.

**Custody Risk.** Custody risk refers to the risks in the process of clearing and settling trades and to the holding of securities by local banks, agents and depositories. Acquiring, holding and transferring interests in securities by book-entry through any security intermediary is subject to the laws and contractual provisions governing the relationship with the intermediary, as well as the laws and contractual provisions governing the relationship between such intermediary and each other intermediary, if any, standing between themselves and the individual security.

Low trading volumes and volatile prices in less developed markets make trades harder to complete and settle. Local agents are held only to the standards of care in the local markets. Governments or trade groups may compel local agents to hold securities in designated depositories that are not subject to independent evaluation. The less developed a country's securities market is, the greater the likelihood of custody problems.

#### **D. Foreign Currencies Transactions**

The Fund may temporarily hold funds in bank deposits in foreign currencies during the completion of investment programs. The Fund may conduct foreign currency exchange transactions either on a spot (cash) basis at the spot rate prevailing in the foreign exchange market or by entering into a forward foreign currency contract. Such a forward contract involves an obligation to purchase or sell a specific amount of a specific currency at a future date, which may be any fixed number of days (usually less than one year) from the date of the contract agreed upon by the parties, at a price set at the time of the contract. Forward contracts are considered "derivatives" -- financial instruments whose performance is derived, at least in part, from the performance of another asset (such as a security, currency or an index of securities). The Fund enters into forward contracts in order to "lock in" the exchange rate between the currency it will deliver and the currency it will receive for the duration of the contract. In addition, the Fund may enter into forward contracts to hedge against risks arising from securities the Fund owns or anticipates purchasing, or the U.S. dollar value of interest and dividends paid on those securities.

At or before settlement of a forward currency contract, the Fund may deliver the currency or terminate its contractual obligation to deliver the currency by purchasing an offsetting contract but see "Non-Deliverable Forwards" below. If the Fund makes delivery of the foreign currency at or before the settlement of a forward contract, it may be required to obtain the currency through the conversion of assets of the Fund into the currency. The Fund may close out a forward contract obligating it to purchase currency by selling an offsetting contract, in which case, it will realize a gain or a loss.

The Fund may invest in a combination of forward currency contracts and U.S. dollar-denominated instruments in an attempt to obtain an investment result that is substantially the same as a direct investment in a foreign currency-denominated instrument. This investment technique creates a "synthetic" position in the particular foreign-currency instrument whose performance the manager is trying to duplicate. For example, the combination of U.S. dollar-denominated money market instruments with "long" forward currency exchange contracts creates a position economically equivalent to a money market instrument denominated in the foreign currency itself. Such combined positions are sometimes necessary when the money market in a particular foreign currency is small or relatively illiquid.

For the purpose of hedging, efficient portfolio management, generating income and/or enhancement of returns, The Fund may also, from time to time, enter into derivative currency transactions, such as forward contracts including currency forwards, cross currency forwards (each of which may result in net short currency exposures), financial and index futures contracts (including currency and currency index futures contracts) or options on currencies or such futures contracts. Such

transactions could be effected with respect to hedges on non-U.S. dollar denominated securities owned by the Fund, sold by the Fund but not yet delivered, or committed or anticipated to be purchased by the Fund. The successful use of these transactions will usually depend on the manager's ability to forecast accurately currency exchange rate movements. Should exchange rates move in an unexpected manner, the Fund may not achieve the anticipated benefits of the transaction, or it may realize losses. In addition, these techniques could result in a loss if the counterparty to the transaction does not perform as promised. Moreover, investors should bear in mind that the Fund is not obligated to actively engage in these transactions; for example, the Fund may not have attempted to hedge its exposure to a particular foreign currency at a time when doing so might have avoided a loss.

For hedging purposes, The Fund may invest in forward currency contracts to hedge either specific transactions (transaction hedging) or portfolio positions (position hedging). Transaction hedging is the purchase or sale of forward currency contracts with respect to specific receivables or payables of the Fund in connection with the purchase and sale of portfolio securities. Position hedging is the sale of a forward currency contract on a particular currency with respect to portfolio positions denominated or quoted in that currency.

The Fund may use forward currency contracts for position hedging if consistent with its policy of trying to expose its net assets to foreign currencies. The Fund are not required to enter into forward currency contracts for hedging purposes and it is possible that the Fund may not be able to hedge against a currency devaluation that is so generally anticipated that the Fund is unable to contract to sell the currency at a price above the devaluation level it anticipates. It also is possible, under certain circumstances, that the Fund may have to limit its currency transactions to qualify as a "regulated investment company" under the Code.

At or before the maturity of a forward currency contract, the Fund may either sell a portfolio security and make delivery of the currency, or retain the security and terminate its contractual obligation to deliver the currency by buying an "offsetting" contract obligating it to buy, on the same maturity date, the same amount of the currency. If the Fund engages in an offsetting transaction, it may later enter into a new forward currency contract to sell the currency.

If the Fund engages in an offsetting transaction, it will incur a gain or loss to the extent that there has been movement in forward currency contract prices. If forward prices go down during the period between the date the Fund enters into a forward currency contract for the sale of a currency and the date it enters into an offsetting contract for the purchase of the currency, the Fund will realize a gain to the extent that the price of the currency it has agreed to sell exceeds the price of the currency it has agreed to buy. If forward prices go up, the Fund will suffer a loss to the extent the price of the currency it has agreed to buy exceeds the price of the currency it has agreed to sell.

Because the Fund may invest in money market instruments denominated in foreign currencies, it may hold foreign currencies pending investment or conversion into U.S. dollars. Although the Fund values its assets daily in U.S. dollars, it does not convert its holdings of foreign currencies into U.S. dollars on a daily basis. The Fund will convert its holdings from time to time, however, and incur the costs of currency conversion. Foreign exchange dealers do not charge a fee for conversion, but they do realize a profit based on the difference between the prices at which they buy and sell various currencies. Thus, a dealer may offer to sell a foreign currency to the Fund at one rate, and offer to buy the currency at a lower rate if the Fund tries to resell the currency to the dealer.

**Non-Deliverable Forwards.** The Fund may also enter into forward contracts that do not provide for physical settlement of two currencies but instead are settled by a single cash payment calculated as the difference between the agreed upon exchange rate and the spot rate at settlement based upon an agreed upon notional amount (non-deliverable forwards).

Under definitions adopted by the CFTC and SEC, non-deliverable forwards are considered swaps. Although non-deliverable forwards have historically been traded in the over-the-counter (OTC) market, as swaps, they may in the future be required to be centrally cleared and traded on public facilities.

**Foreign Currency Transaction Risk.** Foreign currency transactions involve certain costs and risks. The Fund incurs foreign exchange expenses in converting assets from one currency to another. Forward contracts involve a risk of loss if the Adviser is inaccurate in its prediction of currency movements. The projection of short-term currency market movements is extremely difficult and the successful execution of a short-term hedging strategy is highly uncertain. The precise matching of forward contract amounts and the value of the securities involved is generally not possible. Accordingly, it may be necessary for the Fund to purchase additional foreign currency if the market value of the security is less than the amount of the foreign currency the Fund is obligated to deliver under the forward contract and the decision is made to sell the security and make delivery of the foreign currency. The use of forward contracts as a hedging technique does not eliminate fluctuations in the prices of the underlying securities the Fund owns or intends to acquire, but it does fix a rate of exchange

in advance. Although forward contracts can reduce the risk of loss due to a decline in the value of the hedged currencies, they also limit any potential gain that might result from an increase in the value of the currencies. There is also the risk that the other party to the transaction may fail to deliver currency when due which may result in a loss to the Fund.

**Currency Fluctuations.** The value of the Fund's investments is calculated in U.S. dollars each day that the NYSE is open for business. As a result, to the extent that the Fund's assets are invested in instruments denominated in foreign currencies and the currencies appreciate relative to the U.S. dollar, the Fund's NAV per share as expressed in U.S. dollars (and, therefore, the value of your investment) should increase. If the U.S. dollar appreciates relative to the other currencies, the opposite should occur.

The currency-related gains and losses experienced by the Fund will be based on changes in the value of portfolio securities attributable to currency fluctuations only in relation to the original purchase price of such securities as stated in U.S. dollars. Gains or losses on shares of the Fund will be based on changes attributable to fluctuations in the NAV of such shares, expressed in U.S. dollars, in relation to the original U.S. dollar purchase price of the shares. The amount of appreciation or depreciation in the Fund's assets also will be affected by the net investment income generated by the money market instruments in which the Fund invests and by changes in the value of the securities that are unrelated to changes in currency exchange rates.

**Derivatives.** Derivatives are financial instruments that have a value which depends upon, or is derived from, the value of something else, such as one or more underlying securities, pools of securities, options, futures, indexes or currencies. Gains or losses involving derivative instruments may be substantial, because a relatively small price movement in the underlying securities, instrument, currency or index may result in a substantial gain or loss for the Fund.

Historically, an adviser of a fund trading commodity interests (such as futures contracts, options on futures contracts, nondeliverable forwards, swaps and cash-settled foreign currency contracts) has been excluded from regulation as a commodity pool operator ("CPO") pursuant to CFTC Regulation 4.5. In 2012, the CFTC amended Regulation 4.5 to dramatically narrow this exclusion.

Under the amended Regulation 4.5 exclusion, a fund's commodity interests - other than those used for bona fide hedging purposes (as defined by the CFTC) - must be limited such that the aggregate initial margin and premiums required to establish the positions (after taking into account unrealized profits and unrealized losses on any such positions and excluding the amount by which options are "in-the-money" at the time of purchase) does not exceed 5% of the fund's NAV, or alternatively, the aggregate net notional value of the positions, determined at the time the most recent position was established, does not exceed 100% of the fund's NAV (after taking into account unrealized profits and unrealized losses on any such positions). Further, to qualify for the exclusion in amended Regulation 4.5, a fund must satisfy a marketing test, which requires, among other things, that the fund not hold itself out as a vehicle for trading commodity interests.

The Adviser intends to comply with one of the two alternative limitations described above with respect to the Fund and claim an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act ("CEA") with respect to the Fund. The Fund therefore will not be subject to registration or regulation as a CPO under the CEA. Complying with the limitations may restrict the Adviser's ability to use derivatives as part of the Fund's investment strategies. Although the Adviser expects to be able to execute the Fund's strategies within the limitations, performance could be adversely affected.

**Commodities Related Investments.** Although the Fund may not purchase precious metals (such as gold, silver and platinum) or other physical commodities, the Fund may purchase securities backed by physical commodities, including interests in exchange-traded investment trusts and other similar entities, the value of whose shares relates directly to the value of physical commodities held by such an entity. As an investor in such an entity, the Fund would indirectly bear its pro rata share of the entity's expenses, which may include storage and other costs relating to the entity's investments in physical commodities. In addition, the Fund will not qualify for treatment as a RIC under the Code if more than 10% of its annual gross income consists of certain "non-qualifying" income, which includes gains resulting from selling physical commodities (or options or futures contracts thereon unless the gain is realized from certain hedging transactions) and certain other non-passive income. The Fund's investment in securities backed by, or in such entities that invest in, physical commodities generally would produce income that would be subject to this 10% limitation. To remain within this limitation, the Fund may hold such an investment or sell it at a loss, or sell other investments, when for investment reasons it would not otherwise do so. The availability of such measures does not guarantee that the Fund would be able to remain within the limitations of the Code.

Exposure to physical commodities may subject the Fund to greater volatility than investments in traditional securities. The value of such investments may be affected by overall market movements, commodity index volatility, changes in interest rates, or factors affecting a particular industry or commodity, such as supply and demand, drought, floods, weather, embargoes, tariffs and international economic, political and regulatory developments. Their value may also respond to investor perception of instability in the national or international economy, whether or not justified by the facts. However, these investments may help to moderate fluctuations in the value of the Fund's other holdings, because these investments may not correlate with investments in traditional securities. Economic and other events (whether real or perceived) can reduce the demand for commodities, which may reduce market prices and cause the value of the Fund's shares to fall. No active trading market may exist for certain commodities investments, which may impair the ability of the Fund to sell or realize the full value of such investments in the event of the need to liquidate such investments. Certain commodities are subject to limited pricing flexibility because of supply and demand factors. Others are subject to broad price fluctuations as a result of the volatility of the prices for certain raw materials and the instability of supplies of other materials. These additional variables may create additional investment risks and result in greater volatility than investments in traditional securities. Because physical commodities do not generate investment income, the return on investments in physical commodities will be derived solely from the appreciation or depreciation on such investments. Certain types of commodities instruments (such as commodity-linked swaps and commodity-linked structured notes) are subject to the risk that the counterparty to the instrument will not perform or will be unable to perform in accordance with the terms of the instrument.

## **E. Options and Futures**

The Fund may purchase or write put and call options, futures and options on futures to: (1) enhance Fund performance; or (2) to hedge against a decline in the value of securities owned by the Fund or an increase in the price of securities that the Fund plans to purchase.

Specifically, The Fund may purchase or write options on securities in which it may invest or on market indices based in whole or in part on such securities. Options purchased or written by the Fund must be traded on an exchange or over-the-counter. The Fund may invest in futures contracts on market indices based in whole or in part on securities in which The Fund may invest. The Fund may also purchase or write put and call options on these futures contracts. Options and futures contracts are considered to be derivatives. Use of these instruments is subject to regulation by the SEC, the options and futures exchanges on which futures and options are traded or by the CFTC. No assurance can be given that any hedging or income strategy will achieve its intended result.

If the Fund will be financially exposed to another party due to its investments in options or futures, the Fund, may, if required, maintain either: (1) an offsetting ("covered") position in the underlying security or an offsetting option or futures contract; or (2) cash, receivables and liquid debt securities with a value sufficient at all times to cover its potential obligations. The Fund will comply with SEC guidelines with respect to coverage of these strategies and, if the guidelines require, will set aside cash, liquid securities and other permissible assets ("Segregated Assets") on its books and records in the prescribed amount. Segregated Assets and covered positions cannot be sold or closed out while the hedging strategy is outstanding, unless the Segregated Assets or covered positions are replaced with similar assets. As a result, there is a possibility that the use of cover or segregation involving a large percentage of the Fund's assets could impede portfolio management or the Fund's ability to meet redemption requests or other current obligations.

**Options on Securities.** A call option is a contract under which the purchaser of the call option, in return for a premium paid, has the right to buy the security (or index) underlying the option at a specified price at any time during the term of the option. The writer of the call option, who receives the premium, has the obligation upon exercise of the option to deliver the underlying security against payment of the exercise price. A put option gives its purchaser, in return for a premium, the right to sell the underlying security at a specified price during the term of the option. The writer of the put, who receives the premium, has the obligation to buy, upon exercise of the option, the underlying security (or a cash amount equal to the value of the index) at the exercise price. The amount of a premium received or paid for an option is based upon certain factors including the market price of the underlying security, the relationship of the exercise price to the market price, the historical price volatility of the underlying security, the option period and interest rates.

**Options on Indices.** An index assigns relative values to the securities included in the index, and the index fluctuates with changes in the market values of the securities included in the index. Index cash options operate in the same way as the more traditional options on securities except that index options are settled exclusively in cash and do not involve delivery of securities. Thus, upon exercise of index options, the purchaser will realize and the writer will pay an amount based on the differences between the exercise price and the closing price of the index.

**Options on Futures.** Options on futures contracts are similar to options on securities except that an option on a futures contract gives the purchaser the right, in return for the premium paid, to assume a position in a futures contract rather than to purchase or sell a security, at a specified exercise price at any time during the period of the option. Upon exercise of the option, the delivery of the futures position to the holder of the option will be accompanied by transfer to the holder of an accumulated balance representing the amount by which the market price of the futures contract exceeds, in the case of a call, or is less than, in the case of a put, the exercise price of the option on the future.

**Futures Contracts and Index Futures Contracts.** A futures contract is a bilateral agreement where one party agrees to accept, and the other party agrees to make, delivery of cash or an underlying debt security, as called for in the contract, at a specified date and at an agreed upon price.

An index futures contract involves the delivery of an amount of cash equal to a specified dollar amount multiplied by the difference between the index value at the close of trading of the contract and at the price designated by the futures contract. No physical delivery of the securities comprising the index is made. Generally, these futures contracts are closed out prior to the expiration date of the contracts.

A municipal bond futures contract is based on the value of the Bond Buyer Index (“BBI”) which is comprised of 40 actively traded general obligation and revenue bonds. The rating of a BBI issue must be at least “A.” To be considered, the issue must have at least 19 years remaining to maturity, a first call date between 7 and 16 years, and at least one call at par prior to redemption. No physical delivery of the securities is made in connection with municipal bond futures. Rather these contracts are usually settled in cash if they are not closed out prior to their expiration date.

A Treasury bond futures contract is based on the value of an equivalent 20-year, 6% Treasury bond. Generally, any Treasury bond with a remaining maturity or term to call of 15 years as of the first day of the month in which the contracts are scheduled to be exercised will qualify as a deliverable security pursuant to a Treasury bond futures contract. A Treasury note futures contract is based on the value of an equivalent 10-year, 6% Treasury note. Generally, any Treasury note with a remaining maturity or term to call of 6½ years or 10 years, respectively, as of the first day of the month in which the contracts are scheduled to be exercised will qualify as a deliverable security pursuant to Treasury note futures contract.

Since a number of different Treasury notes will qualify as a deliverable security upon the exercise of the option, the price that the buyer will actually pay for those securities will depend on which ones are actually delivered. Normally, the exercise price of the futures contract is adjusted by a conversion factor that takes into consideration the value of the deliverable security if it were yielding 6% as of the first day of the month in which the contract is scheduled to be exercised.

**Commodity Linked Futures.** The Fund may invest in commodity-linked futures contracts. Commodity-linked futures contracts are generally based upon commodities within six main commodity groups: (1) energy, which includes, among others, West Texas Intermediate (WTI) crude oil, Brent crude oil, gas oil, natural gas, gasoline and heating oil; (2) livestock, which includes, among others, feeder cattle, live cattle and hogs; (3) agriculture, which includes, among others, wheat (Kansas City wheat and Chicago wheat), corn and soybeans; (4) industrial metals, which includes, among others, aluminum, copper, lead, nickel and zinc; (5) precious metals, which includes, among others, gold and silver; and (6) softs, which includes cotton, coffee, sugar and cocoa. The price of a commodity futures contract will reflect the storage costs of purchasing the physical commodity. These storage costs include the time value of money invested in the physical commodity plus the actual costs of storing the commodity, less any benefits from ownership of the physical commodity that are not obtained by the holder of a futures contract (these benefits are sometimes referred to as the “convenience yield”). To the extent that these storage costs change for an underlying commodity while the Fund is long futures contracts on that commodity, the value of the futures contract may change proportionately.

**Risks of Options Transactions.** There are certain investment risks associated with options transactions. These risks include: (1) the Adviser’s ability to predict movements in the prices of individual currencies or gold and fluctuations in the general currency markets; (2) imperfect correlation between movements in the prices of options and movements in the price of the currencies or gold hedged or used for cover which may cause a given hedge not to achieve its objective; (3) the fact that the skills and techniques needed to trade these instruments are different from those needed to select the securities in which the Fund invests; and (4) lack of assurance that a liquid secondary market will exist for any particular instrument at any particular time, which, among other things, may hinder the Fund’s ability to limit exposures by closing its positions.

Other risks include the inability of the Fund, as the writer of covered call options, to benefit from any appreciation of the underlying currency or gold above the exercise price, and the possible loss of the entire premium paid for options purchased by the Fund. There is no assurance that a counterparty in an over-the-counter option transaction will be able to perform its obligations.

**Risks of Hedging Strategies.** The Fund may engage in hedging activities. In connection with hedging strategies, the Adviser may cause the Fund to utilize a variety of financial instruments, including index futures contracts and options on futures contracts. Hedging generally is used to mitigate the risk of particular price movements in one or more securities that the Fund owns or intends to acquire. Hedging instruments on stock indices generally are used to hedge against price movements in broad equity market sectors in which the Fund has invested or expects to invest. Hedging strategies, if successful, can reduce the risk of loss by wholly or partially offsetting the negative effect of unfavorable price movements in the investments being hedged. However, hedging strategies can reduce the opportunity for gain by offsetting the positive effect of favorable price movements in the hedged investments. Further, hedging with an index that does not one hundred percent mirror a portfolio introduces the risk of losing money on the hedge as well as on the underlying position. A hedging position taken at the wrong time could have an adverse impact on the Fund's performance. The Fund's ability to use hedging instruments may be limited by tax considerations. The use of hedging instruments is subject to regulations of the SEC, the several options and futures exchanges upon which they are traded, the NFA and various state regulatory authorities.

## **F. Leverage Transactions**

Leverage involves special risks and may involve speculative investment techniques. Leverage exists when cash made available to the Fund through an investment technique is used to make additional Fund investments. Leverage transactions include borrowing for other than temporary or emergency purposes, lending portfolio securities, entering into reverse repurchase agreements, dollar rolls and purchasing securities on a when-issued, delayed delivery or forward commitment basis. The Fund use these investment techniques only when the Adviser believes that the leveraging and the returns available to the Fund from investing the cash will provide investors with a potentially higher return.

**Senior Securities.** Pursuant to Section 18(f)(1) of the 1940 Act, the Fund may not issue any class of senior security or sell any senior security of which it is the issuer, except that the Fund shall be permitted to borrow from any bank so long as immediately after such borrowings, there is an asset coverage of at least 300% and that in the event such asset coverage falls below this percentage, the Fund shall reduce the amount of its borrowings, within 3 days (excluding Sundays and holidays), to an extent that the asset coverage shall be at least 300%.

**Borrowing and Reverse Repurchase Agreements.** The Fund may borrow money from a bank in amounts up to 33 $\frac{1}{3}$ % of total assets at the time of borrowing to, among other things, finance the purchase of securities for its portfolio. Entering into reverse repurchase agreements, pledging securities, and purchasing securities on a when-issued, delayed delivery or forward delivery basis are subject to this limitation. A reverse repurchase agreement is a transaction in which the Fund sells securities to a bank or securities dealer and simultaneously commits to repurchase the securities from the bank or dealer at an agreed upon date and at a price reflecting a market rate of interest unrelated to the sold securities. An investment of the Fund's assets in reverse repurchase agreements will increase the volatility of the Fund's NAV. A counterparty to a reverse repurchase agreement must be a primary dealer that reports to the Federal Reserve Bank of New York or one of the largest 100 commercial banks in the United States.

**Securities Lending and Repurchase Agreements.** The Fund may lend portfolio securities in an amount up to 33 $\frac{1}{3}$ % of its total assets to brokers, dealers and other financial institutions. In a portfolio securities lending transaction, the Fund receives from the borrower an amount equal to the interest paid or the dividends declared on the loaned securities during the term of the loan as well as the interest on the collateral securities, less any fees (such as finders or administrative fees) the Fund pays in arranging the loan. The Fund may share the interest it receives on the collateral securities with the borrower. The terms of the Fund's loans permit the Fund to reacquire loaned securities on five business days' notice or in time to vote on any important matter. Loans are subject to termination at the option of the Fund or the borrower at any time, and the borrowed securities must be returned when the loan is terminated. The Fund may pay fees to arrange for securities loans.

The Fund may enter into repurchase agreements, which are transactions in which the Fund purchases a security and simultaneously agrees to resell that security to the seller at an agreed upon price on an agreed upon future date, normally, one to seven days later. If the Fund enters into a repurchase agreement, it will maintain possession of the purchased securities and any underlying collateral.

Securities loans and repurchase agreements must be continuously collateralized and the collateral must have market value at least equal to the value of the Fund's loaned securities, plus accrued interest or, in the case of repurchase agreements, equal to the repurchase price of the securities, plus accrued interest.

**Segregated Assets.** The Fund will comply with SEC guidelines with respect to coverage of certain strategies and, if the guidelines require, it will set aside on its books and records, cash, liquid securities and other permissible assets ("Segregated Assets") in a segregated account with the Union Bank, N.A. ("Custodian") in the prescribed amount. The asset value, which

is marked to market daily, will be at least equal to the Fund's commitments under these transactions less any proceeds or margin on deposit.

### **G. Illiquid and Restricted Securities**

The term "illiquid securities" means securities that cannot be disposed of within seven days in the ordinary course of business at approximately the amount at which the Fund has valued the securities. The Fund has a non-fundamental policy pursuant to which it may not invest more than 15% of its net assets in illiquid securities. Illiquid securities include: (1) repurchase agreements not entitling the holder to payment of principal within seven days; (2) purchased over-the-counter options; (3) securities which are not readily marketable; and (4) except as otherwise determined by the Adviser, securities subject to contractual or legal restrictions on resale because they have not been registered under the 1933 Act (sometimes called restricted securities).

Rule 144A Securities, which are restricted securities, may be less liquid investments than registered securities because such securities may not be readily marketable in broad public markets. A Rule 144A restricted security carries the risk that the Fund may not be able to sell the security when the portfolio manager considers it desirable to do so or that the Fund may have to sell the security at a lower price than that which would have been available if the security were more liquid. Although there is a substantial market for Rule 144A securities, it is not possible to predict exactly how the market for Rule 144A securities will develop. A restricted security which when purchased was liquid in the institutional markets may subsequently become illiquid.

Limitations on resale may have an adverse effect on the marketability of a security and the Fund also might have to register a restricted security in order to dispose of it, resulting in expense and delay. The Fund might not be able to dispose of restricted or illiquid securities promptly or at reasonable prices and might thereby experience difficulty satisfying redemption requests. There can be no assurance that a liquid market will exist for any security at any particular time. Any security, including securities determined by the Adviser to be liquid, can become illiquid.

**Determination of Liquidity.** The Adviser determines and monitors the liquidity of Fund assets under management, pursuant to guidelines approved by the Board, and reports periodically on its decisions to the Board. The Adviser takes into account a number of factors in reaching liquidity decisions, including but not limited to: (1) the frequency of trades and quotations for the security; (2) the number of dealers willing to purchase or sell the security and the number of other potential buyers; (3) the willingness of broker-dealers to undertake to make a market in the security; and (4) the nature of the marketplace trades, including the time needed to dispose of the security, the method of soliciting offers and the mechanics of the transfer.

An institutional market has developed for certain restricted securities. Accordingly, contractual or legal restrictions on the resale of a security may not be indicative of the liquidity of the security. If such securities are eligible for purchase by institutional buyers in accordance with Rule 144A under the 1933 Act or other exemptions, the Adviser may determine that the securities are liquid pursuant to guidelines adopted by the Board.

### **H. Investment Company Securities, Exchange Traded Funds ("ETFs"), Exchange Traded Products ("ETPs") and Exchange Traded Notes ("ETNs")**

The Fund may invest in shares of open-end and closed-end investment companies, to the extent permitted by the 1940 Act. In addition, The Fund may invest in ETFs (which may, in turn, invest in equities, bonds, and other financial vehicles). An ETF holds a portfolio of securities designed to track a particular market segment or index. Some examples of ETFs are SPDRs<sup>®</sup>, streetTRACKS<sup>®</sup>, DIAMONDS, NASDAQ 100 Index Tracking Stock ("QQQs") iShares<sup>®</sup> and VIPERs<sup>®</sup>. The Fund could purchase an ETF to gain exposure to a portion of the U.S. or foreign market.

The Fund, as a shareholder of another investment company, will bear its pro-rata portion of the other investment company's Advisory fee and other expenses, in addition to its own expenses.

As a shareholder, the Fund must rely on the investment company or ETF to achieve its investment objective. If the investment company or ETF fails to achieve its investment objective, the value of the Fund's investment will decline, adversely affecting the Fund's performance. To the extent that the Fund invests in open-end or closed-end investment companies that invest primarily in the securities of companies located outside the U.S., see the risks related to foreign securities described above.

**ETFs.** The risks of owning an ETF generally reflect the risks of owning the underlying securities they are designed to track, although lack of liquidity in an ETF could result in it being more volatile than the underlying portfolio of securities and ETFs have management fees that increase their costs versus the costs of owning the underlying securities directly. In

addition, because ETFs are listed on national stock exchanges and are traded like stocks listed on an exchange, ETF shares potentially may trade at a discount or a premium. Investments in ETFs are also subject to brokerage and other trading costs, which could result in greater expenses to the Fund. Finally, because the value of ETF shares depends on the demand in the market, the Adviser may not be able to liquidate the Fund's holdings at the most optimal time, adversely affecting the Fund's performance.

**ETPs.** The Fund may invest in ETPs. The Fund is subject to the same risks as the underlying ETPs because the risks of owning shares of an underlying ETP generally reflect the risks of owning the underlying instruments the ETP is designed to track. Lack of liquidity in an underlying ETP can result in its value being more volatile than the underlying instruments.

**ETNs.** The Fund may invest in ETNs, which are structured debt securities. ETNs' liabilities are unsecured general obligations of the issuer. Most ETNs are designed to track a particular market segment or index. ETNs have expenses associated with their operation. When the Fund invests in an ETN, in addition to directly bearing expenses associated with its own operations, it will bear its pro rata portion of the ETN's expenses. The risks of owning an ETN generally reflect the risks of owning the instruments the ETN is designed to track, although lack of liquidity in an ETN could result in it being more volatile than the underlying portfolio of securities. In addition, because of ETN expenses, compared to owning the underlying securities directly, it may be more costly to own an ETN. The value of an ETN security also should be expected to fluctuate with the credit rating of the issuer.

### **I. Natural Resource-Related Investments**

The Fund may invest in companies involved in the natural resource sector, as well as securities and other instruments whose value is tied to natural resources. The Fund's investments in natural resources, securities and other instruments whose value is tied to natural resources and securities of companies involved in the natural resources sector (collectively, "natural resources investments") may be affected by natural disasters (such as fires and floods), political events affecting access to a natural resource (such as a military coup in a country with control over the resource), monetary policies and interest rates (including inflationary and deflationary signals), trade imbalances, social and political agendas regarding energy use and conservation, activity in the commodities markets, government regulations (both foreign and domestic) that affect the supply of and/or demand for a natural resource and the public's perception of any and/or all of the above. The profitability and value of the Fund's investments in natural resources investments may, therefore, be affected by the same. Although natural resources may at times experience substantial short-term price fluctuations, they are less subject to company-specific risks than are the equity securities of companies in the natural resources sector; as a result, the prices of natural resources may be less volatile than the equity securities of companies in the natural resources sector. Further, natural resources investments may perform differently than the market as a whole. To the extent that the Fund makes natural resources investments, therefore, the Fund may perform differently than the overall market. In addition, the Fund may incur higher custody and transaction costs in connection with investments in natural resources and will not realize any income from such investments.

### **J. Temporary Defensive Position and Cash Investments**

The Fund may assume a temporary defensive position and may invest without limit in money market instruments that are of high quality. High quality money market instruments are those instruments that are rated in one of the two highest short-term rating categories or, if not rated, determined by the Adviser to be of comparable quality. The Fund also may invest in high quality money market instruments pending investment of cash balances.

Money market instruments usually have maturities of one year or less and fixed rates of return. The money market instruments in which The Fund may invest include U.S. Government Securities, commercial paper, time deposits, bankers acceptances and certificates of deposit issued by domestic banks, corporate notes and short-term bonds and money market mutual funds. The Fund may only invest in money market mutual funds to the extent permitted by the 1940 Act.

The money market instruments in which The Fund may invest may have variable or floating rates of interest. These obligations include master demand notes that permit investment of fluctuating amounts at varying rates of interest pursuant to a direct arrangement with the issuer of the instrument. The issuer of these obligations often has the right, after a given period, to prepay the outstanding principal amount of the obligations upon a specified number of days' notice. These obligations generally are not traded, nor generally is there an established secondary market for these obligations. To the extent a demand note does not have a 7-day or shorter demand feature and there is no readily available market for the obligation, it is treated as an illiquid security.

## **K. Cyber-Security**

The Fund, and its service providers, may be prone to operational and information security risks resulting from cyber-attacks. Cyber-attacks include, among other behaviors, stealing or corrupting data maintained online or digitally, denial of service attacks on websites, the unauthorized release of confidential information or various other forms of cyber security breaches. Cyber-attacks affecting the Fund or its third-party service providers may adversely impact the Fund. For instance, cyber-attacks may interfere with the processing of shareholder transactions, impact the Fund's ability to calculate its NAV, cause the release of private shareholder information or confidential business information, impede trading, subject the Fund to regulatory fines or financial losses and/or cause reputational damage. The Fund may also incur additional costs for cyber security risk management purposes. While the Fund's service providers have established business continuity plans in the event of, and risk management systems to prevent, such cyber-attacks, there are inherent limitations in such plans and systems including the possibility that certain risks have not been identified. Furthermore, the Fund cannot control the cyber security plans and systems put in place by its service providers or any other third parties whose operations may affect a Fund or its shareholders. Similar types of cyber security risks are also present for issues or securities in which the Fund may invest, which could result in material adverse consequences for such issuers and may cause the Fund's investment in such companies to lose value.

## INVESTMENT LIMITATIONS

---

The Trust, on behalf of the Fund, has adopted the following investment policies which are fundamental policies that may not be changed without the affirmative vote of a majority of the outstanding voting securities of the Fund. “A majority of the outstanding voting securities of the Fund,” as defined by the 1940 Act, means the affirmative vote of the lesser of (1) more than 50% of the outstanding shares of the Fund, or (2) 67% or more of the shares present at a meeting, if more than 50% of the outstanding shares are represented at the meeting in person or by proxy.

The Fund’s investment objective is a non-fundamental policy. Non-fundamental policies may be changed by the Board without shareholder approval.

For purposes of the Fund’s investment limitations, all percentage limitations apply immediately after an investment. Except with respect to the borrowing money policy set forth in (1) below, if a percentage limitation is adhered to at the time of an investment, a later increase or decrease in the percentage resulting from any change in value or net assets will not result in a violation of such restrictions. The Fund continuously monitors its holdings in illiquid securities. If the value of the Fund’s holdings of illiquid securities at any time exceeds the percentage limitation applicable at the time of acquisition (15% of net assets) due to subsequent fluctuations in value or other reasons, the Adviser will consider what actions are appropriate to maintain adequate liquidity, such as an orderly disposition of the illiquid securities, to the extent possible.

**Fundamental Limitations.** The Fund has adopted the following investment limitations that cannot be changed by the Board without shareholder approval.

1. The Fund may not borrow money, except to the extent permitted by the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
2. The Fund may not issue senior securities, except to the extent permitted by the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
3. The Fund will not make loans to other persons, except: (a) by loaning portfolio securities; (b) by engaging in repurchase agreements; or (c) by purchasing nonpublicly offered debt securities. For purposes of this limitation, the term “loans” shall not include the purchase of a portion of an issue of publicly distributed bonds, debentures or other securities.
4. The Fund may not engage in the business of underwriting securities except to the extent that the Fund may be considered an underwriter within the meaning of the 1933 Act in the acquisition, disposition or resale of its portfolio securities or in connection with investments in other investment companies, or to the extent otherwise permitted under the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
5. The Fund may not purchase or sell real estate, except to the extent permitted under the 1940 Act, the rules and regulations thereunder and any applicable exemptive relief.
6. The Fund may not invest in commodities or commodity contracts, except (1) to the extent permitted by the 1940 Act and the Code, the rules and regulations thereunder and any applicable exemptive or interpretive relief, and (2) that the Fund may purchase and sell commodity-linked instruments, such as commodity-linked notes, options, futures, forward contracts, swaps and interests in commodity pools and other entities that purchase and sell commodities and commodity contracts.
7. The Fund will not invest more than 25% of its total assets in a particular industry. This limitation is not applicable to investments in obligations issued or guaranteed by the U.S. government, its agencies and instrumentalities or repurchase agreements with respect thereto.

With respect to the fundamental policy relating to borrowing money set forth in (1) above, the 1940 Act permits the Fund to borrow money in amounts of up to one-third of the Fund’s total assets, at the time of borrowing, from banks for any purpose (the Fund’s total assets include the amounts being borrowed). To limit the risks attendant to borrowing, the 1940 Act requires the Fund to maintain at all times an “asset coverage” of at least 300% of the amount of its borrowings (not including borrowings for temporary purposes in an amount not exceeding 5% of the value of the Fund’s total assets). In the event that such asset coverage falls below this percentage, the Fund is required to reduce the amount of its borrowings within three days (not including Sundays and holidays) so that the asset coverage is restored to at least 300%. Asset coverage means the ratio that the value of the Fund’s total assets (including amounts borrowed), minus liabilities other than borrowings, bears to the aggregate amount of all borrowings.

With respect to the fundamental policy relating to issuing senior securities set forth in (2) above, “senior securities” are defined as Fund obligations that have a priority over the Fund’s shares with respect to the payment of dividends or the distribution of Fund assets. The 1940 Act prohibits the Fund from issuing any class of senior securities or selling any senior securities of which it is the issuer, except that the Fund is permitted to borrow from a bank if consistent with the fundamental policy set forth in (1) above.

With respect to the fundamental policy relating to making loans set forth in (3) above, the 1940 Act does not prohibit the Fund from making loans; however, SEC staff interpretations currently prohibit funds from lending more than one-third of their total assets, except through the purchase of debt obligations.

With respect to the fundamental policy relating to investing in real estate set forth in (5) above, the Fund may, to the extent permitted by applicable law, invest in securities or other instruments directly or indirectly secured by real estate and invest in securities or other instruments issued by issuers that invest in real estate. Investments in securities of issuers that are exposed to or involved in the real estate business will not be deemed to be a purchase or sale of real estate.

### A. Board of Trustees

The Trust is governed by its Board of Trustees. The Board oversees the management and operations of the Trust and the Fund, in accordance with federal law, Delaware law and the stated policies of the Fund. The Board oversees the Trust's officers and service providers, including the Adviser, which is responsible for the management of the day-to-day operations of the Fund based on policies and agreements reviewed and approved by the Board. In carrying out these responsibilities, the Board regularly interacts with and receives reports from senior personnel of service providers and the Trust's Chief Compliance Officer ("CCO"). The Board also is assisted by the Trust's independent auditor (which reports directly to the Trust's Audit Committee), independent counsel and other experts as appropriate. The Trustees serve until their respective successors have been elected and qualified or until their earlier death, resignation or removal.

The Fund does not hold itself out as related to any other series within the Trust for purposes of investment and investor services, nor does it share the same investment adviser with any other series. As a result, the term "Fund Complex" applies only to the Fund.

**Board Structure and Related Matters.** Independent Trustees constitute at least a majority of the Board members. David Tucker, an Independent Trustee, serves as Independent Chair of the Board. The Independent Chair's responsibilities include: setting an agenda for each meeting of the Board; presiding at all meetings of the Board and Independent Trustees; and serving as a liaison with other trustees, the Trust's officers, other management personnel and counsel to the Fund. The Independent Chair also performs such other duties as the Board may from time to time determine.

The Trustees discharge their responsibilities collectively as a Board, as well as through Board committees, each of which operates pursuant to a charter or procedures approved by the Board that delineates the specific responsibilities of that committee. The Board has established three standing committees: the Audit Committee, the Nominating Committee and the Qualified Legal Compliance Committee. The members and responsibilities of each Board committee are summarized below.

The Board periodically evaluates its structure and composition as well as various aspects of its operations. The Board believes that its leadership structure, including its Independent Chair position and its committees, is appropriate for the Trust in light of, among other factors, the asset size and nature of the Fund, the number of funds overseen by the Board, the arrangements for the conduct of the Fund's operations, the number of trustees and the Board's responsibilities. On an annual basis, the Board conducts a self-evaluation that considers, among other matters, whether the Board and its committees are functioning effectively and whether, given the size and composition of the Board and each of its committees, the Trustees are able to oversee effectively the number of funds.

The Board holds four regularly scheduled in-person meetings each year. The Board may hold special meetings, as needed, either in person or by telephone, to address matters arising between regular meetings. At least once per quarter during a regularly scheduled in-person meeting of the Board, the Independent Trustees meet without the presence of interested Trustees.

The Trustees are identified in the table below, which provides information as to their principal business occupations held during the last five years and certain other information. Each Trustee serves until his or her death, resignation or removal and replacement. The address for all Trustees is c/o Atlantic Fund Services, Three Canal Plaza, Suite 600, Portland, Maine 04101.

Name and Year of Birth	Position with the Trust	Length of Time Served	Principal Occupation(s) During Past Five Years	Number of Series in Fund Complex Overseen By Trustee	Other Directorships Held By Trustee During Past Five Years
<b>Independent Trustees</b>					
David Tucker Born: 1958	Chairman of the Board; Trustee; Chairman, Nominating Committee and Qualified Legal Compliance Committee	Since 2013	Director, Blue Sky Experience (a charitable endeavor), since 2008; Senior Vice President & General Counsel, American Century Companies (an investment management firm), 1998-2008.	1	Trustee, Forum Funds; Trustee, Forum ETF Trust; Trustee, U.S. Global Investors Funds.
Mark D. Moyer Born: 1959	Trustee; Chairman Audit Committee	Since 2013	Chief Financial Officer, Freedom House (a NGO advocating political freedom and democracy), since 2017; independent consultant providing interim CFO services, principally to non-profit organizations, 2011-2017; Chief Financial Officer, Institute of International Education (a NGO administering international educational exchange programs), 2008-2011; Chief Financial Officer and Chief Restructuring Officer, Ziff Davis Media Inc. (an integrated media company), 2005-2008; Adjunct Professor of Accounting, Fairfield University from 2009-2012.	1	Trustee, Forum Funds; Trustee, Forum ETF Trust; Trustee, U.S. Global Investors Funds.
Jennifer Brown-Strabley Born: 1964	Trustee	Since 2013	Principal, Portland Global Advisors 1996-2010.	1	Trustee, Forum Funds; Trustee, Forum ETF Trust; Trustee, U.S. Global Investors Funds.
<b>Interested Trustees<sup>(1)</sup></b>					
Stacey E. Hong Born: 1966	Trustee	Since 2013	President, Atlantic since 2008	1	Trustee, Forum Funds; Trustee, U.S. Global Investors Funds.

Name and Year of Birth	Position with the Trust	Length of Time Served	Principal Occupation(s) During Past Five Years	Number of Series in Fund Complex Overseen By Trustee	Other Directorships Held By Trustee During Past Five Years
John Y. Keffer Born: 1942	Trustee	Since 2013	Chairman, Atlantic since 2008; Chairman, Forum Investment Advisors, LLC since 2011; President, Forum Foundation (a charitable organization) since 2005; President, Forum Trust, LLC (a non-depository trust company chartered in the State of Maine) since 1997.	1	Trustee, Forum ETF Trust; Trustee, U.S. Global Investors Funds; Director, Wintergreen Fund, Inc.

<sup>(1)</sup> Stacey E. Hong and John Y. Keffer are currently treated as interested persons of the Trust, as defined in the 1940 Act, due to their affiliations with Atlantic. Atlantic and Forum Investment Advisors, LLC are subsidiaries of Forum Holdings Corp. I, a Delaware corporation that is wholly owned by Mr. Keffer.

In addition to the information set forth in the table above, each Trustee possesses certain relevant qualifications, experience, attributes or skills. The following provides additional information about these qualifications and experience.

David Tucker: Mr. Tucker has extensive experience in the investment management industry, including experience in senior management, legal and compliance roles at two large mutual fund complexes; service on various committees of the Investment Company Institute (“ICI”); and director of ICI Mutual (a mutual insurance company sponsored by the investment company industry), including service as chairman of the underwriting, risk and fraud committees of ICI Mutual’s board of directors. Mr. Tucker actively serves charitable organizations in the metropolitan Kansas City area.

Mark D. Moyer: Mr. Moyer has extensive experience with finance. He currently serves as chief financial officer for a NGO advocating democracy, political freedom and human rights, and has served as chief financial officer for an integrated media company and a not-for-profit organization. Mr. Moyer also served as an adjunct professor of accounting at Fairfield University.

Jennifer Brown-Strabley: Ms. Brown-Strabley has extensive experience in the financial services and investment management industry, including institutional sales experience in global fixed-income and related quantitative research. Ms. Brown-Strabley also has experience in business start-up and operations and as a former principal of a registered investment adviser, for which she continues to provide consulting advice from time to time.

Stacey E. Hong: Mr. Hong has extensive experience in auditing as a certified public accountant, and in the financial services industry as the president of a fund service provider specializing in administration, accounting, and transfer agency services for pooled investment products. Mr. Hong serves as a principal executive officer, and has served as the principal financial officer, for certain investment companies.

John Y. Keffer: Mr. Keffer has extensive experience in the investment management industry, including organizational experience as chairman and chief executive officer of a fund service provider; and multiple years of service as a trustee. Mr. Keffer also served as a trustee of Monarch Funds from 2003 to 2009 and Core Trust from 1995 to 2006 and continues to serve as an interested trustee of Forum ETF Trust and as an independent director of Wintergreen Fund, Inc., another open-end management investment company.

**Risk Oversight.** Consistent with its responsibility for oversight of the Trust and the Fund, the Board oversees the management of risks relating to the administration and operation of the Trust and the Fund. The Adviser, as part of its responsibilities for the day-to-day operations of the Fund, is responsible for day-to-day risk management. The Board, in the exercise of its reasonable business judgment, also separately considers potential risks that may impact the Fund. The Board performs this risk management oversight directly and, as to certain matters, through its committees (described below) and through the

Independent Trustees. The following provides an overview of the principal, but not all, aspects of the Board’s oversight of risk management for the Trust and the Fund.

In general, the Fund’s risks include, among others, investment risk, valuation risk, compliance risk and operational risk. The Board has adopted, and periodically reviews, policies and procedures designed to address these and other risks to the Trust and the Fund. In addition, under the general oversight of the Board, the Adviser, and the Subadviser and other service providers have themselves adopted a variety of policies, procedures and controls designed to address particular risks. Different processes, procedures and controls are employed with respect to different types of risks. Further, the Adviser and the Subadviser oversee and regularly monitor the investments, operations and compliance of the Fund’s investments.

The Board also oversees risk management for the Trust and the Fund through review of regular reports, presentations and other information from officers of the Trust and other persons. Senior officers of the Trust, senior officers of the Adviser and the CCO regularly report to the Board on a range of matters, including those relating to risk management. In this regard, the Board periodically receives reports regarding other service providers to the Trust, either directly or through the CCO. On at least a quarterly basis, the Independent Trustees meet with the CCO to discuss matters relating to the Fund’s compliance program. Further, at least annually, the Board receives a report from the CCO regarding the effectiveness of the Fund’s compliance program.

The Board receives regular reports from a Valuation Committee, composed of the Principal Executive Officer, the Principal Financial Officer, the CCO, a senior fund accounting member, a senior representative from the Administrator’s regulatory administration group and a representative of the Adviser. The Valuation Committee operates pursuant to the Trust’s Valuation and Error Correction Policy (the “Valuation Policy”), as approved by the Board. The Valuation Committee reports to the Board on the pricing of the Fund’s shares and the valuation of the Fund’s portfolio securities; recommends, subject to approval by the Board, independent pricing services to provide a value for Fund assets; makes and monitors fair value determinations pursuant to the Valuation Policy; and carries out any other functions delegated to it by the Board relating to the valuation of Fund assets.

The Board also regularly receives reports from the Adviser or the Subadviser with respect to the investments and securities trading of the Fund. For example, typically, the Board receives reports, presentations and other information from the Adviser or the Subadviser on at least an annual basis in connection with the Board’s consideration of the renewal of the investment advisory agreement between the Adviser and the Trust on behalf of the Fund (the “Advisory Agreement”). Also, if applicable, the Board receives reports from the Adviser and other service providers in connection with the Board’s consideration of the renewal of any distribution plan of the Fund under Rule 12b-1 under the 1940 Act. Senior officers of the Trust and senior officers of the Adviser also report regularly to the Audit Committee on valuation matters, internal controls and accounting and financial reporting policies and practices. In addition, the Audit Committee receives regular reports from the Trust’s independent auditors on internal control and financial reporting matters.

**Trustee Ownership in the Fund and the Fund Complex.** The following table sets forth each Trustee’s ownership of the Fund and the Fund Complex.

<b>Trustees</b>	<b>Dollar Range of Beneficial Ownership in the Fund as of December 31, 2017</b>	<b>Aggregate Dollar Range of Ownership as of December 31, 2017 in all Registered Investment Companies Overseen by Trustee in the Fund Complex</b>
<b>Independent Trustees</b>		
David Tucker	None	None
Mark D. Moyer	None	None
Jennifer Brown-Strabley	None	None
<b>Interested Trustee</b>		
Stacey E. Hong	None	None
John Y. Keffer	None	None

**B. Principal Officers of the Trust**

The officers of the Trust conduct and supervise its daily business. As of the date of this SAI, the officers of the Trust, their years of birth and their principal occupations during the past five calendar years are as set forth below. Each officer serves

until his or her death, resignation or removal and replacement. The business address of each officer is c/o Atlantic Fund Services, Three Canal Plaza, Suite 600, Portland, Maine 04101.

<b>Name and Year of Birth</b>	<b>Position with the Trust</b>	<b>Length of Time Served</b>	<b>Principal Occupation(s) During Past 5 Years</b>
Jessica Chase Born: 1970	President; Principal Executive Officer	Since 2015	Senior Vice President, Atlantic since 2008.
Karen Shaw Born: 1972	Treasurer; Principal Financial Officer	Since 2013	Senior Vice President, Atlantic since 2008.
Zachary Tackett Born: 1988	Vice President; Secretary and Anti-Money Laundering Compliance Officer	Since 2014	Counsel, Atlantic since 2014; Intern Associate, Coakley & Hyde, PLLC, 2010-2013.
Timothy Bowden Born: 1969	Vice President	Since 2013	Manager, Atlantic since 2008.
Michael J. McKeen Born: 1971	Vice President	Since 2013	Senior Vice President, Atlantic since 2008.
Geoffrey Ney Born: 1975	Vice President	Since 2013	Manager, Atlantic since 2013; Senior Fund Accountant, Atlantic, 2008-2013.
Todd Proulx Born: 1978	Vice President	Since 2013	Manager, Atlantic since 2013; Senior Fund Accountant, Atlantic, 2008-2013.
Carlyn Edgar Born: 1963	Chief Compliance Officer	Since 2013	Senior Vice President, Atlantic since 2008.

### **C. Ownership of Securities of the Adviser and Related Companies**

As of December 31, 2017, no Independent Trustee (or any of his immediate family members) owned beneficially or of record, securities of any Trust investment adviser, the Trust's principal underwriter, or any person (other than a registered investment company) directly or indirectly controlling, controlled by or under common control with any Trust investment adviser or principal underwriter.

### **D. Information Concerning Trust Committees**

**Audit Committee.** The Trust's Audit Committee, which typically meets quarterly, consists of Ms. Brown-Strabley and Messrs. Tucker and Moyer. Pursuant to a charter adopted by the Board, the Audit Committee assists the Board in fulfilling its responsibility for oversight of the quality and integrity of the accounting, auditing and financial reporting practices of the Trust. It is directly responsible for the appointment, termination, compensation and oversight of work of the independent auditors to the Trust. In so doing, the Audit Committee reviews the methods, scope and results of the audits and audit fees charged, and reviews the Trust's internal accounting procedures and controls. During the fiscal year ended November 30, 2017, the Audit Committee met four times.

**Nominating Committee.** The Trust's Nominating Committee, which meets when necessary, consists of Ms. Brown-Strabley and Messrs. Tucker and Moyer. Pursuant to a charter adopted by the Board, the Nominating Committee is charged with the duty of nominating all trustees and committee members and presenting these nominations to the Board. The Nominating Committee will not consider any nominees for trustees recommended by security holders. During the fiscal year ended November 30, 2017, the Nominating Committee did not meet.

**Qualified Legal Compliance Committee.** The Qualified Legal Compliance Committee (the "QLCC"), which meets when necessary, consists of Ms. Brown-Strabley and Messrs. Tucker, Moyer and Hong. The QLCC evaluates and recommends resolutions to reports from attorneys servicing the Trust regarding evidence of material violations of applicable federal and state law or the breach of fiduciary duties under applicable federal and state law by the Trust or an employee or agent of the Trust. During the fiscal year ended November 30, 2017, the QLCC did not meet.

## E. Compensation of Trustees and Officers

Independent Trustees of the Trust each receive an annual fee of \$16,000 for service to the Trust. The Chairman of the Board is paid an additional annual fee of \$5,000. The Trustees and Chairman may receive additional fees for special Board meetings. Each Trustee is also reimbursed for all reasonable out-of-pocket expenses incurred in connection with his or her duties as a Trustee, including travel and related expenses incurred in attending Board meetings. The Trust has no pension or retirement plan. No other entity affiliated with the Trust pays any compensation to the Trustees.

The following table sets forth the fees paid to each Trustee by the Fund and the Fund Complex for the fiscal year ended November 30, 2017.

Trustee	Aggregate Compensation from the Fund	Pension or Retirement Benefits Accrued as part of Fund Expenses	Total Compensation from Fund Complex
<b>Independent Trustees</b>			
David Tucker	\$1,121	N/A	\$1,121
Mark D. Moyer	\$854	N/A	\$854
Jennifer Brown-Strabley	\$854	N/A	\$854
<b>Interested Trustees</b>			
Stacey E. Hong	\$0	N/A	\$0
John Y. Keffer	\$0	N/A	\$0

## F. Investment Adviser

**Services of Adviser.** The Adviser serves as investment adviser to the Fund pursuant to the Advisory Agreement. Under the Advisory Agreement, the Adviser furnishes, at its own expense, all services, facilities, and personnel necessary in connection with managing the Fund's investments and effecting portfolio transactions for the Fund. The Adviser may compensate brokers or other service providers ("Financial Intermediaries") out of its own assets, and not as additional charges to the Fund, in connection with the sale and distribution of shares of the Fund and/or servicing of these shares.

**Ownership of Adviser and the Subadviser.** The Adviser is a Delaware limited liability company. Peter Higgins and William Monaghan are the sole Managing Members and owners of the Adviser. ROW Asset Management, LLC, the Subadviser, is a Delaware limited liability company owned by the executive management team.

**Information Concerning Accounts Managed by Portfolio Managers.** The following table provides information regarding other accounts managed by the portfolio managers as of November 30, 2017:

Name of Portfolio Manager	Number of Other Accounts Managed and Assets by Account Type			Number of Accounts and Assets for Which Advisory Fee is Performance-Based		
	Registered Investment Companies	Other Pooled Investment Vehicles	Other Accounts	Registered Investment Companies	Other Pooled Investment Vehicles	Other Accounts
Peter Higgins	None	None	None	None	None	None
Bill Monaghan	None	None	None	None	None	None
Jeffrey Weiser	None	2 accounts \$579,750,000	6 accounts \$206,500,000	None	2 accounts \$106,000,000	3 accounts \$102,000,000

**Conflicts of Interest.** Actual or apparent conflicts of interest may arise when a portfolio manager has day-to-day management responsibilities with respect to more than one fund or other account. More specifically, portfolio managers who manage multiple funds and/or other accounts may be presented with the following conflicts:

- The management of multiple client accounts may result in a portfolio manager devoting unequal time and attention to the management of the Fund. The Adviser/Subadviser may seek to manage such competing interests for the time and attention of the portfolio managers by having the portfolio managers focus on a particular investment discipline.

- If a portfolio manager identifies a limited investment opportunity which may be suitable for more than one account, the Fund may be unable to take full advantage of that opportunity due to an allocation of filled purchase or sale orders across all eligible accounts. To deal with these situations, the Adviser/Subadviser have adopted procedures for allocating portfolio transactions across multiple accounts.
- With respect to securities transactions for the Fund, the Adviser/Subadviser determine which broker to use to execute each order, consistent with their duty to seek best execution of the transaction. However, with respect to certain other accounts (such as other pooled investment vehicles that are not registered mutual funds and other accounts managed for organizations and individuals), the Adviser/Subadviser may be limited by the client with respect to the selection of brokers or may be instructed to direct trades through a particular broker. In these cases, the Adviser/Subadviser may place separate, non-simultaneous transactions for the Fund and another account which may temporarily affect the market price of the security or the execution of the transaction, or both, to the detriment of the Fund or the other account.
- Finally, the appearance of a conflict of interest may arise if the Adviser/Subadviser have an incentive, such as a performance-based management fee, which relates to the management of one fund or account but not all funds and accounts with respect to which a portfolio manager has day-to-day management responsibilities.

The Adviser/Subadviser have adopted certain compliance procedures, which are designed to address these types of conflicts. The Adviser/Subadviser have developed and implemented policies and procedures designed to ensure that all clients are treated equitably. In addition, compliance oversight and monitoring ensures adherence to policies designed to avoid conflicts. The Adviser's/Subadviser's policies and procedures address trade aggregation and allocation. Typically when aggregating trades across funds and/or other accounts, the size of the trade for each fund and/or other account is determined by proportional size of the fund and/or other account and such determination is made pre-trade. Moreover, in aggregated trades each fund and/or other account receives the average share price and transaction costs are shared on a pro-rata basis. Additionally, given the nature of the Adviser's/Subadviser's investment process and their Fund and/or other accounts, the Adviser's/Subadviser's investment management team services are typically applied collectively to the management of all the Funds and/or other accounts following the same strategy.

Compensation of the Adviser's/Subadviser's portfolio management teams are not based solely upon performance of the portion of the Fund managed by the Adviser/Subadvisers. Fund performance is not a determinative factor in compensation, as it might encourage investment decisions deviating from the Fund's mandate. To mitigate the potential for conflict to have a team member favor one Fund over another Fund and/or other account, the Adviser/Subadvisers have established procedures, including policies to monitor trading and best execution for all funds and/or other accounts.

There is no guarantee that such procedures will detect each and every situation in which a conflict arises.

#### **Information Concerning Compensation of Portfolio Managers.**

**CVR Portfolio Funds LLC.** As co-owners of the Adviser, compensation to Mr. Monaghan and Mr. Higgins for their services to the Fund will be allocated out of the Adviser's income, which is net revenue minus the Adviser's expenses. Mr. Monaghan and Mr. Higgins will not receive a performance fee for their services to the Fund. Mr. Monaghan and Mr. Higgins currently do not advise other advisory client accounts and, as a result, do not receive compensation for other advisory services.

**ROW Asset Management LLC.** The portfolio manager's compensation consists of a salary and discretionary bonus. The base salary is based on the job description, and the overall qualifications, experience and tenure at ROW, of the individual. The bonus is based upon the profitability of the firm and individual performance. Individual performance is subjective and may be based on a number of factors.

**Portfolio Manager Ownership in the Fund.** The Adviser has provided the following information regarding each portfolio manager's ownership in the Fund:

<b>Portfolio Manager</b>	<b>Dollar Range of Beneficial Ownership in the Fund as of November 30, 2017</b>
Peter Higgins	Over \$1,000,000
Bill Monaghan	Over \$1,000,000
Jeffrey Weiser	None

**Fees.** The Adviser receives an advisory fee from the Fund at an annual rate equal to 1.10% of the Fund’s average annual daily net assets under the terms of the Advisory Agreement. The Subadviser’s fee is calculated as a percentage of the Fund’s average daily net assets allocated to the Subadviser for management but is paid by the Adviser and not the Fund. Thus, any fee breakpoints or other reduction in the Subadviser’s fee rates inures to the benefit of Adviser rather than the Fund. The aggregate subadvisory fees paid may change over time due to a number of factors such as subadvisory fee waivers or the addition or subtraction of a subadviser with varying management fees. The aggregate amount paid by the Adviser to its Subadviser for the fiscal year ended November 30, 2017 was 0.14%. The actual advisory fee rate retained by the Adviser for the fiscal year ended November 30, 2017 was 0.54%. The Adviser has contractually agreed to waive its fee and/or reimburse Fund expenses to limit Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement (excluding all taxes, interest, portfolio transaction expenses, proxy expenses and extraordinary expenses) of Institutional Shares to 1.65%, and Investor Shares to 1.90% through at least April 1, 2019 (“Expense Cap”). The Expense Cap may only be raised or eliminated with the consent of the Board. The Adviser may be reimbursed by the Fund for fees waived and expenses reimbursed by the Adviser pursuant to the Expense Cap if such payment is made within three years of the fee waiver or expense reimbursement and does not cause the Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement of a class to exceed the lesser of (i) the then-current expense cap, and (ii) the expense cap in place at the time the fees/expenses were waived/reimbursed. Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement will increase if exclusions from the Expense Cap apply.

The advisory fee, if not waived, is accrued daily and paid monthly by the Fund and is assessed based on the daily net assets of the Fund. In addition to receiving its advisory fee from the Fund, the Adviser may also act and be compensated as an investment manager for its clients with respect to assets that such clients have invested in the Fund. If you have a separately managed account with the Adviser with assets invested in the Fund, the Adviser will not assess or receive any management fee on the portion of the separately managed account invested in the Fund.

Table 1 in Appendix B shows the dollar amount of advisory fees accrued by the Fund, the amount of advisory fees waived and/or expenses reimbursed by the Adviser, if any, and the actual advisory fees retained by the Adviser. The data provided is for the last three fiscal years.

**Advisory Agreement.** The Fund’s Advisory Agreement remains in effect for an initial period of two years from the date of its effectiveness, and thereafter the Advisory Agreement must be approved at least annually by the Board or by majority vote of the shareholders, and in either case by a majority of the trustees who are not parties to the Advisory Agreement or interested persons of any such party (other than as trustees of the Trust).

The Advisory Agreement is terminable without penalty by the Trust with respect to the Fund on 60 days’ written notice when authorized either by vote of the Fund’s shareholders or by a majority vote of the Board, or by the Adviser on 60 days’ written notice to the Trust. The Advisory Agreement terminates immediately upon assignment.

Under the Advisory Agreement, the Adviser is not liable for any mistake of judgment, mistake of law, or act or omission, except for willful misfeasance, bad faith, or gross negligence in the performance of its duties or by reason of reckless disregard of its obligations and duties under the Advisory Agreement.

## **G. Distributor**

**Distribution Services.** Foreside Fund Services, LLC (the “Distributor”) and is located at Three Canal Plaza, Suite 100, Portland, Maine 04101. The Distributor is a registered broker-dealer and is a member of the Financial Industry Regulatory Authority, Inc. (“FINRA”). The Distributor is not affiliated with the Adviser or any other service provider for the Trust.

Under a Distribution Agreement with the Trust, the Distributor acts as the agent of the Trust in connection with the continuous offering of shares of the Fund. The Distributor continually distributes shares of the Fund on a best efforts basis. The Distributor has no obligation to sell any specific quantity of Fund shares. The Distributor and its officers have no role in determining the investment policies or which securities are to be purchased or sold by the Trust.

The Distributor may enter into agreements with selected broker-dealers, banks or other financial intermediaries for distribution of shares of the Fund. With respect to certain financial intermediaries and related fund “supermarket” platform arrangements, the Fund and/or the Adviser, rather than the Distributor, typically enters into such agreements. These financial intermediaries may charge a fee for their services and may receive shareholder service or other fees from parties other than the Distributor. These financial intermediaries may otherwise act as processing agents and are responsible for promptly transmitting purchase, redemption and other requests to the Fund.

Investors who purchase shares through financial intermediaries will be subject to the procedures of those intermediaries through which they purchase shares, which may include charges, investment minimums, cutoff times and other restrictions in addition to, or different from, those listed herein. Information concerning any charges or services will be provided to customers by the financial intermediary through which they purchase shares. Investors purchasing shares of the Fund through financial intermediaries should acquaint themselves with their financial intermediary’s procedures and should read the Prospectus in conjunction with any materials and information provided by their financial intermediary. The financial intermediary, and not its customers, will be the shareholder of record, although customers may have the right to vote shares depending upon their arrangement with the intermediary. The Distributor does not receive compensation from the Fund for its distribution services except the distribution/service fees with respect to the shares of those classes for which a Rule 12b-1 plan is effective, as applicable. The Adviser pays the Distributor a fee for certain distribution-related services.

**Distribution Plan.** The Trust, including a majority of Independent Trustees who have no direct or indirect financial interest in the operation of the Rule 12b-1 plan, has adopted a Rule 12b-1 plan under which the Fund is authorized to pay to the Distributor and any other entity authorized by the Board, including the Adviser (collectively, “payees”), a fee equal to 0.25% of the average daily net assets of the Fund’s Investor Shares for distribution services and/or the servicing of shareholder accounts. The payees may pay any or all amounts received under the Rule 12b-1 plan to other persons for any distribution or service activity conducted on behalf of the Fund. The Rule 12b-1 plan is a core component of the ongoing distribution of the Fund’s Investor Shares, which is intended to attract and retain assets from prospective investors and may realize potential economies of scale for shareholders in the form of future lower expense ratios. Pursuant to an agreement between the Distributor and the Adviser, the Distributor may reimburse certain distribution-related and/or shareholder servicing expenses incurred by the Adviser.

The Rule 12b-1 plan provides that the payees may incur expenses for distribution and service activities including, but not limited to (1) any sales, marketing and other activities primarily intended to result in the sale of Fund shares and (2) providing services to holders of shares related to their investment in the Fund, including, without limitation, providing assistance in connection with responding to shareholder inquiries regarding the Fund’s investment objective, policies and other operational features and inquiries regarding shareholder accounts. Expenses for such activities include compensation to employees and expenses, including overhead and telephone and other communication expenses, of a payee who engages in or supports the distribution of Fund shares or who provides shareholder servicing such as responding to shareholder inquiries regarding the Fund’s operations; the incremental costs of printing (excluding typesetting) and distributing prospectuses, statements of additional information, annual reports and other periodic reports for use in connection with the offering or sale of Fund shares to any prospective investors; and the costs of preparing, printing and distributing sales literature and advertising materials used by the Distributor, the Adviser or others in connection with the offering of Fund shares for sale to the public.

The Rule 12b-1 plan requires the payees to prepare and submit to the Board, at least quarterly, and the Board to review, written reports setting forth all amounts expended under the Rule 12b-1 plan and identifying the activities for which those expenditures were made. The Rule 12b-1 plan obligates the Fund to compensate payees for services and not to reimburse them for expenses incurred.

The Rule 12b-1 plan provides that it will remain in effect for one year from the date of its adoption and thereafter shall continue in effect provided it is approved at least annually by the shareholders or by the Board, including a majority of the Independent Trustees. The Rule 12b-1 plan further provides that it may not be amended to materially increase the costs that the Fund or class bears for distribution/shareholder servicing pursuant to the Rule 12b-1 plan without approval by affected shareholders and that other material amendments of the Rule 12b-1 plan must be approved by the Independent Trustees. The Rule 12b-1 plan may be terminated with respect to Investor Shares at any time by the Board, by a majority of the Independent Trustees or by the shareholders of Investor Shares.

Table 2 in Appendix B shows the dollar amount of fees payable by the Fund to the Distributor or its agents under the Rule 12b-1 plan, the amount of fees waived by the Distributor or its agents and the actual fees received by the Distributor and its agents under the Rule 12b-1 plan. The data provided is for the last three fiscal years.

## H. Other Fund Service Providers

**Administrator, Fund Accountant, Transfer Agent, and Compliance Services.** Atlantic and its subsidiaries provide administration, compliance, fund accounting and transfer agency services to the Fund. Atlantic is a subsidiary of Forum Holdings Corp I. John Y. Keffer, a trustee, is the Chairman of Atlantic and is also the founder and owner of Forum Holdings Corp. I, the parent entity of Atlantic.

Pursuant to the Atlantic Services Agreement (the “Services Agreement”), the Fund pays Atlantic and its subsidiaries a bundled fee for administration, compliance, fund accounting and transfer agency services. The Fund also pays Atlantic and its subsidiaries certain surcharges and shareholder account fees. The fee is accrued daily by the Fund and is paid monthly based on the average net assets, transactions and positions for the prior month.

The Services Agreement continues in effect until terminated, so long as its continuance is specifically approved or ratified with such frequency and in such manner as required by applicable law. After an initial three-year term, the Services Agreement is terminable with or without cause and without penalty by the Trust or by the Administrator on 120 days’ written notice to the other party. The Services Agreement is also terminable for cause by the non-breaching party on at least 60 days’ written notice to the other party, provided that such party has not cured the breach within that notice period. Under the Services Agreement, Atlantic is not liable to the Fund or the Fund’s shareholders for any act or omission, except for willful misfeasance, bad faith or negligence in the performance of its duties or by reason of reckless disregard of its obligations and duties under the Services Agreement. The Services Agreement also provides that Atlantic will not be liable to a shareholder for any loss incurred due to a NAV difference if such difference is less than or equal to \$0.01 and in addition, limits the amount of any loss for which Atlantic would be liable. Also, Atlantic is not liable for the errors and omissions of others, including the entities that supply security prices to Atlantic and the Fund. Losses incurred by the Fund as a result of acts or omissions by Atlantic or any other service provider for which Atlantic or the service provider is not liable to the Fund would be borne by the Fund and through the Fund, by its Shareholders.

As Administrator, Atlantic administers the Fund’s operations except those that are the responsibility of any other service provider hired by the Trust, all in such manner and to such extent as may be authorized by the Board. The Administrator’s responsibilities include, but are not limited to: (1) overseeing the performance of administrative and professional services rendered to the Fund by others, including its custodian, transfer agent and dividend disbursing agent as well as legal, auditing, shareholder servicing and other services performed for the Fund; (2) preparing for filing and filing certain regulatory filings (*i.e.*, registration statements and shareholder reports) subject to Trust counsel and/or independent auditor oversight; (3) overseeing the preparation and filing of the Fund’s tax returns, the preparation of financial statements and related reports to the Fund’s shareholders, the SEC and state and other securities administrators; (4) providing the Fund with adequate general office space and facilities and providing persons suitable to the Board to serve as officers of the Trust; (5) assisting the Adviser in monitoring Fund holdings for compliance with prospectus investment restrictions and assisting in preparation of periodic compliance reports; and (6) with the cooperation of the Adviser, the officers of the Trust and other relevant parties, preparing and disseminating materials for meetings of the Board.

Atlantic provides a Principal Executive Officer, a Principal Financial Officer, a CCO, and an Anti-Money Laundering Compliance Officer to the Fund, as well as certain additional compliance support functions.

Atlantic Shareholder Services, LLC (the “Transfer Agent”) serves as transfer agent and distribution paying agent for the Fund. The Transfer Agent is registered as a transfer agent with the SEC. The Transfer Agent maintains an account for each shareholder of record of the Fund and is responsible for processing purchase and redemption requests and paying distributions to shareholders of record.

As Fund accountant, Atlantic provides fund accounting services to the Fund. These services include calculating the NAV of each Fund class.

Atlantic, located at Three Canal Plaza, Suite 600, Portland, Maine 04101, also maintains certain books and records of the Fund that are required by applicable federal regulations.

Table 3 in Appendix B shows the dollar amount of the fees accrued by the Fund for administration services, the amount of fees waived by Atlantic, if any, and the actual fees retained by Atlantic under the Services Agreement. The data provided is for the last three fiscal years.

**Custodian.** MUFG Union Bank, N.A. (formerly, Union Bank, N.A.) (the “Custodian”) is the custodian for the Fund. The Custodian safeguards and controls the Fund’s cash and securities, determines income and collects interest on Fund

investments. The Custodian may employ subcustodians to provide custody of the Fund's domestic and foreign assets. The Custodian also maintains certain books and records of the Fund that are required by applicable federal regulations. The Custodian is located at 350 California Street, 6th Floor, San Francisco, California 94104.

**Legal Counsel.** Stradley Ronon Stevens & Young, LLP, 1250 Connecticut Avenue, N.W., Suite 500, Washington, DC 20036-2652, serves as legal counsel to the Trust.

**Independent Registered Public Accounting Firm.** BBD, LLP ("BBD"), 1835 Market Street, 3rd Floor, Philadelphia, Pennsylvania 19103, is the independent registered public accounting firm for the Fund, providing audit and tax services. BBD audits the annual financial statements of the Fund and provides the Fund with an audit opinion. BBD also reviews certain regulatory filings of the Fund.

## **PORTFOLIO TRANSACTIONS**

---

### **A. How Securities are Purchased and Sold**

Purchases and sales of portfolio securities that are fixed-income securities (for instance, money market instruments and bonds, notes and bills) usually are principal transactions. In a principal transaction, the party from which the Fund purchases or to which the Fund sells is acting on its own behalf (and not as the agent of some other party such as its customers). These securities normally are purchased directly from the issuer or from an underwriter or market maker for the securities. There usually are no brokerage commissions paid for these securities.

Purchases and sales of portfolio securities that are equity securities (for instance, common stock and preferred stock) are generally effected if: (1) the security is traded on an exchange, through brokers that charge commissions; and (2) the security is traded in the over-the-counter markets, in a principal transaction directly from a market maker. In transactions on stock exchanges, commissions are negotiated.

When transactions are executed in an over-the-counter market, the Adviser or the Subadviser will seek to deal with the primary market makers, but when necessary in order to obtain best execution, the Adviser or the Subadviser will utilize the services of others.

The price of securities purchased from underwriters includes a disclosed fixed commission or concession paid by the issuer to the underwriter, and prices of securities purchased from dealers serving as market makers reflect the spread between the bid and asked price.

In the case of fixed-income and equity securities traded in the over-the-counter markets, there is generally no stated commission, but the price usually includes an undisclosed commission, markup or markdown.

### **B. Commissions Paid**

Table 4 in Appendix B shows the dollar amount of the aggregate brokerage commissions paid by the Fund; the amount of commissions paid to an affiliate of the Fund, the Adviser, Subadviser or the Distributor; the percentage of brokerage commissions paid to an affiliate of the Fund, the Adviser, Subadviser or the Distributor; and the percentage of transactions executed by an affiliate of the Fund, the Adviser, Subadviser or the Distributor. The data provided is for the last three fiscal years.

### **C. Adviser Responsibility for Purchases and Sales and Choosing Broker-Dealers**

The Adviser places orders for the purchase and sale of securities with broker-dealers selected by and at the discretion of the Adviser. The Fund does not have any obligation to deal with a specific broker or dealer in the execution of portfolio transactions. Allocations of transactions to brokers and dealers and the frequency of transactions are determined by the Adviser in its best judgment and in a manner deemed to be in the best interest of the Fund rather than by any formula.

The Adviser seeks “best execution” for all portfolio transactions. This means that the Adviser seeks the most favorable price and execution available. The Fund may not always pay the lowest commission or spread available. Rather, in determining the amount of commissions (including certain dealer spreads) paid in connection with securities transactions, the Adviser takes into account factors such as the size of the order, the difficulty of execution, the efficiency of the executing broker’s facilities (including the research services described below) and any risk assumed by the executing broker-dealer. The Fund may pay a higher commission if, for example, the broker-dealer has specific expertise in a particular type of transaction (due to factors such as size or difficulty) or is highly efficient in trade execution.

The Adviser may also give consideration to brokerage and research services furnished to the Adviser by broker-dealers and may cause the Fund to pay these broker-dealers a higher commission or spread than may be charged by other broker-dealers. Research services may include reports that are common in the industry, such as research reports and periodicals, quotation systems, software for portfolio management and formal databases. Typically, the Adviser uses the research to manage all client accounts. Therefore, the commission dollars spent for research generally benefit all of the Adviser’s clients and the Fund’s investors, although a particular client may not benefit from research received on each occasion. The Adviser does not reduce its fees because the Adviser receives research.

Table 5 in Appendix B lists the Fund’s directed brokerage in return for research services, the amount of transactions so directed, and the amount of commissions earned by the broker-dealer since commencement of operations.

#### **D. Counterparty Risk**

The Adviser or the Subadviser monitors the creditworthiness of counterparties to the Fund's transactions and intends to enter into a transaction only when it believes that the counterparty presents appropriate credit risks.

#### **E. Transactions through Affiliates**

The Adviser or the Subadviser may effect brokerage transactions through affiliates of the Adviser or the Subadviser (or affiliates of those persons) pursuant to procedures adopted by the Trust and in accordance with applicable law.

#### **F. Other Accounts of the Adviser**

Investment decisions are the product of many factors, including basic suitability for the particular client involved. Likewise, a particular security may be bought or sold for certain clients even though it could have been bought or sold for other clients at the same time. In some instances, with any required consent, one client may sell a particular security to another client. In addition, two or more clients may simultaneously purchase or sell the same security, in which event each day's transactions in such security are, insofar as is possible, averaged as to price and allocated between such clients in a manner which, in the Adviser's or the Subadviser's opinion, is in the best interest of the affected accounts and is equitable to each and in accordance with the amount being purchased or sold by each. There may be circumstances when purchases or sales of a portfolio security for one client could have an adverse effect on another client that has a position in that security. In addition, when purchases or sales of the same security for the Fund and other client accounts managed by the Adviser or the Subadviser occur contemporaneously, the purchase or sale orders may be aggregated in order to obtain any price advantages available to large denomination purchases or sales.

#### **G. Portfolio Turnover**

The frequency of portfolio transactions of the Fund (the portfolio turnover rate) will vary from year to year depending on many factors. From time to time, the Fund may engage in active short-term trading to take advantage of price movements affecting individual issues, groups of issues or markets. Higher portfolio turnover rates may result in increased brokerage costs to the Fund and a possible increase in short-term capital gains (taxable to shareholders as ordinary income when distributed to them) or losses. An annual portfolio turnover rate of 100% would occur if all the securities in the Fund were replaced once in a period of one year.

Portfolio turnover rate is defined under the rules of the SEC as the value of the securities purchased or securities sold, excluding all securities whose maturities at time of acquisition were one year or less, divided by the average monthly value of such securities owned during the year. Based on this definition, instruments with remaining maturities of less than one year, including options and futures contracts in which the Fund invests, are excluded from the calculation of portfolio turnover rate.

#### **H. Securities of Regular Broker-Dealers**

From time to time the Fund may acquire and hold securities issued by its "regular brokers and dealers" or the parents of those brokers and dealers. For this purpose, regular brokers and dealers are the ten brokers or dealers that: (1) received the greatest amount of brokerage commissions during the Fund's last fiscal year; (2) engaged in the largest amount of principal transactions for portfolio transactions of the Fund during the Fund's last fiscal year; or (3) sold the largest amount of the Fund's shares during the Fund's last fiscal year.

Table 6 in Appendix B lists the regular brokers and dealers of the Fund whose securities (or the securities of the parent company) were acquired since commencement of operations and the aggregate value of the Fund's holdings of those securities as of the Fund's most recent period ended November 30, 2017.

#### **I. Portfolio Holdings**

Portfolio holdings as of the end of the Fund's annual and semi-annual fiscal periods are reported to the SEC on Form N-CSR within 10 days of the mailing of the annual or semi-annual report (typically no later than 70 days after the end of each period). Portfolio holdings as of the end of the first and third fiscal quarters are reported to the SEC on Form N-Q within 60 days after the end of such period. You may request a copy of the Fund's latest annual or semi-annual report to shareholders or a copy of the Fund's latest Form N-Q, when it is available, which contains the Fund's portfolio holdings, by contacting

the Transfer Agent at the address or phone number listed on the cover of this SAI. You may also obtain a copy of the Fund's latest Form N-CSR and Form N-Q by accessing the SEC's website at [www.sec.gov](http://www.sec.gov).

The Fund's nonpublic portfolio holdings information is received by certain service providers in advance of public release in the course of performing or enabling them to perform the contractual or fiduciary duties necessary for the Fund's operations that the Fund has retained them to perform so long as the disclosure is subject to duties of confidentiality imposed by law and/ or contract as determined by the Fund's officers and, if applicable, the Board. The Fund's portfolio holdings are available in real-time on a daily basis to the Adviser, the Administrator and the Custodian. In addition, the Distributor, the independent auditors, proxy voting services, mailing services, and financial printers and ratings or ranking organizations may have access, but not on a daily real-time basis, to the Fund's nonpublic portfolio holdings information on an ongoing basis. The trustees, Trust's officers, legal counsel to the Trust and to the Independent Trustees, and the Fund's independent registered public accounting firm may receive such information on an as needed basis. Disclosure of portfolio holdings to these entities is subject to receipt of reasonable assurance that: (1) the information will be kept confidential; (2) no employee or agent will use the information to effect trading or for their personal benefit; and (3) the nature and type of information that any employee or agent, in turn, may disclose to third-parties is limited.

From time to time, nonpublic information regarding the Fund's portfolio holdings may also be disclosed to certain mutual fund consultants, analysts, or other entities or persons ("Recipients") that have a legitimate business purpose in receiving such information. Any disclosure of information more current than the latest publicly available portfolio holdings information will be made only if a Trust officer determines that: (1) the more current information is necessary for a Recipient to complete a specified task; (2) the Fund has legitimate business purposes for disclosing the information; and (3) the disclosure is in the best interests of the Fund and its shareholders. Any Recipient receiving such information shall agree in writing to: (1) keep the information confidential; (2) use it only for agreed-upon purposes; and (3) not trade or advise others to trade securities, including shares of the Fund, on the basis of the information. Such confidentiality agreements entered into for the receipt of nonpublic information shall also provide, among other things, that the Recipient: (1) will limit access to the information to its employees and agents who are obligated to keep and treat such information as confidential; (2) assume responsibility for any breach of the terms of the confidentiality agreement by its employees; and (3) upon request from the Trust, will return or promptly destroy the information. The Trust officer shall report to the Board at its next regularly scheduled Board meeting the entering into of an agreement with a Recipient for the disclosure of nonpublic portfolio holdings information and shall include in the report the Trust officer's reasons for determining to permit such disclosure.

The Adviser or the Subadviser may provide investment management for accounts of clients other than the Fund, which may result in some of those accounts having a composition substantially similar to that of the Fund. The Adviser, Subadviser and their affiliates may provide regular information to clients and others regarding the holdings in accounts that each manages, but no information is provided to clients or others that identifies the actual composition of the Fund's holdings, specifies the amount of the Fund's assets invested in a security or specifies the extent of any such similarities among accounts managed by the Adviser or Subadviser.

No compensation is received by the Fund, or, to the Fund's knowledge, paid to the Adviser or any other party in connection with the disclosure of the Fund's portfolio holdings. The codes of ethics of the Trust and the Adviser are intended to address, among other things, potential conflicts of interest arising from the misuse of information concerning the Fund's portfolio holdings. In addition, the Fund's service providers may be subject to confidentiality provisions contained within their service agreements, codes of ethics, professional codes, or other similar policies that address conflicts of interest arising from the misuse of such information.

The Adviser, Administrator and Distributor must inform a Trust officer if it identifies any conflict between the interests of shareholders and those of another party resulting from the disclosure of nonpublic portfolio holdings information. Such conflicts will be reported to the Board for appropriate action at its next regularly scheduled meeting.

There is no assurance that the Fund's portfolio holdings disclosure policy will protect the Fund against potential misuse of holdings information by individuals or firms in possession of that information.

## PURCHASE AND REDEMPTION INFORMATION

---

### A. General Information

You may effect purchases or redemptions or request any shareholder privilege by contacting the Transfer Agent.

The Fund accepts orders for the purchase or redemption of shares of the Fund on any weekday except days when the New York Stock Exchange (the “NYSE”) is closed. Under unusual circumstances, the Fund may accept orders when the NYSE is closed if deemed appropriate by the Trust’s officers.

The shares of the Fund may not be available for sale in the state in which you reside. Please check with your investment professional to determine the Fund’s availability.

### B. Additional Purchase Information

Shares of each class of the Fund are offered on a continuous basis by the Distributor.

The Fund reserves the right to refuse any purchase request.

Fund shares are normally issued for cash only. In its discretion, the Fund may accept portfolio securities that meet the investment objective and policies of the Fund as payment for Fund shares. The Fund may allow an in kind purchase provided that, among other things: (i) the purchase will not dilute the interests of its shareholders; (ii) the assets accepted by the Fund consist of securities that are appropriate, in type and amount, for investment by the Fund in light of its investment objective and policies and current holdings; (iii) market quotations are readily available for the securities; (iv) in determining the value of the assets contributed and the corresponding amount of shares issued, the Trust’s Valuation Policy will be applied; (v) the transaction must comply with the Trust’s Affiliated Persons and Transactions Policy if the person investing is an affiliated person; and (vi) the Adviser to the Fund discloses to the Board the existence of, and all material facts relating to, any conflicts of interest between the Adviser and the Fund in the proposed in-kind purchase.

**IRAs.** All contributions into an individual retirement account (an “IRA”) through the automatic investing service are treated as IRA contributions made during the year that the contribution is received.

**UGMAs/UTMAs.** If the custodian’s name is not in the account registration of a gift or transfer to minor (“UGMA/UTMA”) account, the custodian must provide instructions in a manner indicating custodial capacity.

### C. Additional Redemption Information

You may redeem Fund shares at NAV.

The Fund may redeem shares involuntarily, (1) to reimburse the Fund for any loss sustained by reason of the failure of a shareholder to make full payment for shares purchased by the shareholder; or (2) to collect any charge relating to transactions effected for the benefit of a shareholder that is applicable to the Fund’s shares as provided in the Prospectus.

**Suspension of Right of Redemption.** The right of redemption may not be suspended for more than seven days after the tender of Fund shares, except for any period during which: (1) the NYSE is closed (other than customary weekend and holiday closings) or during which the SEC determines that trading thereon is restricted; (2) an emergency (as determined by the SEC) exists as a result of which disposal by the Fund of its securities is not reasonably practicable or as a result of which it is not reasonably practicable for the Fund fairly to determine the value of its net assets; or (3) the SEC has entered a suspension order for the protection of the shareholders of the Fund.

**Redemption in Kind.** Redemption proceeds normally are paid in cash. If deemed appropriate and advisable by the Adviser, the Fund may satisfy a redemption request from a shareholder by distributing portfolio securities pursuant to procedures adopted by the Board. The Trust has filed an election with the SEC pursuant to which the Fund may effect a redemption in portfolio securities only if the particular shareholder is redeeming more than \$250,000 or 1% of the Fund’s total net assets, whichever is less, during any 90-day period.

**NAV Determination.** In determining the NAV of each Fund class, securities for which market quotations are readily available are valued at current market value using the valuation price from the primary exchange where the security is listed, as provided by an independent pricing service or, if no sales price is reported, the mean of the last bid and ask prices.

If market quotations are not readily available, then securities are valued at fair value as determined by the Board (or its delegate). For further information, see the “General Information” section in the Prospectus.

**Distributions.** Distributions of net investment income will be reinvested at the NAV of the applicable class (unless you elect to receive distributions in cash) as of the last day of the period with respect to which the distribution is paid. Distributions of net realized capital gains will be reinvested at the NAV of the applicable class (unless you elect to receive distributions in cash) on the payment date for the distribution. Cash payments may be made more than seven days following the date on which distributions would otherwise be reinvested.

## TAXATION

---

The tax information set forth in the Prospectus and in this section relates solely to federal tax law and assumes that the Fund qualifies for treatment as a RIC under that law (as discussed below). This information is only a summary of certain key federal income tax considerations affecting the Fund and its shareholders and is in addition to the information provided in the Prospectus. No attempt has been made to present a complete explanation of the federal tax treatment of the Fund or the tax implications to shareholders. The discussions here and in the Prospectus are not intended as substitutes for careful tax planning.

This “Taxation” section is based on the IRC, the regulations thereunder, and IRS interpretations and similar authority on which the Fund may rely, all as in effect on the date hereof, as well as on court decisions through that date. Future legislative, regulatory or administrative changes or court decisions may significantly change the tax rules applicable to the Fund and its shareholders. Any of these changes or court decisions may have a retroactive effect.

*This is for general information only and not tax advice. Each investor should consult their own tax advisor as to the federal, state, local, and foreign tax provisions applicable to them.*

### A. Qualification for Treatment as a Regulated Investment Company

The Fund has elected and intends to qualify, or, if newly organized, intends to elect and qualify for each taxable year as a RIC under the IRC. This qualification does not involve governmental supervision of management or investment practices or policies of the Fund.

The taxable year-end of the Fund is November 30, which is the same as the Fund’s fiscal year-end.

**Qualification as a Regulated Investment Company.** As a RIC, the Fund will not be subject to federal income tax on the portion of its investment company taxable income (generally, interest, dividends, the excess of net short-term capital gain over net long-term capital loss, net gains and losses from certain foreign currency transactions and other ordinary income, net of expenses, without regard to the deduction for dividends paid) and net capital gain (that is, the excess of net long-term capital gain over net short-term capital loss) that it distributes to shareholders. To qualify to be taxed as a RIC for a taxable year, the Fund must satisfy the following requirements, among others:

- The Fund must distribute an amount equal to the sum of at least 90% of its investment company taxable income for the taxable year (“Distribution Requirement”). Certain distributions made by the Fund after the close of its taxable year are considered distributions attributable to that taxable year for purposes of satisfying this requirement.
- The Fund must derive at least 90% of its gross income for the taxable year from (1) dividends, interest, payments with respect to securities loans, and gains from the sale or other disposition of securities or foreign currencies, or other income (including gains from options, futures or forward contracts) derived from its business of investing in securities or those currencies and (2) net income from an interest in a qualified publicly traded partnership (“QPTP”) (“Gross Income Requirement”). A QPTP is defined as a “publicly traded partnership” (generally, a partnership the interests in which are “traded on an established securities market” or are “readily tradable on a secondary market (or the substantial equivalent thereof)”) that derives less than 90% of its gross income from income described in clause (1).
- The Fund must satisfy the following asset diversification requirements (“Diversification Requirements”) at the close of each quarter of the taxable year: (1) at least 50% of the value of its total assets must consist of cash and cash items, U.S. government securities, securities of other RICs, and securities of other issuers, with these other securities limited, in respect of any one issuer, to an amount that does not exceed 5% of the value of the Fund’s total assets and that does not represent more than 10% of the issuer’s outstanding voting securities (equity securities of a QPTP being considered voting securities for these purposes); and (2) no more than 25% of the value of its total assets may be invested in (a) the securities of any one issuer (other than U.S. government securities and securities of other RICs), (b) the securities (other than securities of other RICs) of two or more issuers that the Fund controls and that are engaged in the same, similar, or related trades or businesses, or (c) the securities of one or more QPTPs.

In some circumstances, the character and timing of income realized by the Fund for purposes of the Gross Income Requirement or the identification of the issuer for purposes of the Diversification Requirements is uncertain under current law with respect to a particular investment, and an adverse determination or future guidance by the IRS with respect to such

type of investment may adversely affect the Fund's ability to satisfy these requirements. See, "Certain Tax Rules Applicable to Fund Transactions" below with respect to the application of these requirements to certain types of investments. In other circumstances, the Fund may be required to sell portfolio holdings in order to meet the Gross Income Requirement, Distribution Requirement, or Diversification Requirements, which may have a negative impact on the Fund's income and performance.

**Failure to Qualify.** If for any taxable year the Fund does not qualify for treatment as a RIC, all of its taxable income (including its net capital gain) would be subject to tax at the applicable corporate tax rate without any deduction for dividends paid to shareholders, and the dividends would be taxable to the shareholders as ordinary income to the extent of the Fund's current and accumulated earnings and profits (except that, for individual and certain other non-corporate shareholders, the part thereof that is "qualified dividend income" would be subject to federal income tax at the rates for net capital gain – a maximum rate of 15% or 20%, depending on a shareholder's level of taxable income and the shareholder's filing status – and those dividends would be eligible for the dividends-received deduction available to corporations under certain circumstances). Furthermore, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make substantial distributions before requalifying for RIC treatment. The Board reserves the right not to maintain the qualification of the Fund as a RIC if it determines such a course of action to be beneficial to shareholders.

Failure to qualify for treatment as a RIC would thus have a negative impact on the Fund's after-tax performance. It is possible that the Fund will not qualify as a RIC in any given taxable year.

If the Fund fails to satisfy the Gross Income Requirement for any taxable year, it nevertheless will be considered to have satisfied that requirement for that year if, among other things, the failure "is due to reasonable cause and not due to willful neglect" and the Fund pays a tax in an amount equal to the excess of its gross income that is not qualifying income for purposes of that requirement over one-ninth of its gross income that is such qualifying income.

If the Fund fails to satisfy either of the Diversification Requirements at the close of any quarter of its taxable year by reason of a discrepancy existing immediately after its acquisition of any security that is wholly or partly the result of that acquisition during that quarter, it will not lose its status for that quarter as a RIC if the discrepancy is eliminated within 30 days after the quarter's close. If the Fund fails to satisfy either of the Diversification Requirements (other than a "de minimis" failure, as defined in the IRC) for a quarter and the preceding sentence does not apply, it nevertheless will be considered to have satisfied those requirements for that quarter if, among other things, the failure "is due to reasonable cause and not due to willful neglect" and the Fund disposes of the assets that caused the failure within six months after the last day of the quarter in which it identifies the failure in the manner to be prescribed by the IRS; in that case, the Fund will also be liable for a tax equal to the greater of \$50,000 or the amount determined by multiplying the net income generated by those assets for the period from the date the failure occurs to the date of disposition thereof by the rate of tax applicable to corporations.

**Portfolio Turnover.** For investors that hold their Fund shares in a taxable account, a high portfolio turnover rate may result in higher taxes. This is because a fund with a high turnover rate is likely to accelerate the recognition of capital gains and more of such gains are likely to be taxable as short-term rather than long-term capital gains in contrast to a comparable fund with a low turnover rate. Any such higher taxes would reduce the Fund's after-tax performance.

**Deferral of Late Year Losses.** The Fund may elect to treat part or all of any "qualified late year loss" as if it had been incurred in the succeeding taxable year in determining the Fund's taxable income, net capital gain, net short-term capital gain, and earnings and profits. The effect of this election is to treat any such "qualified late year loss" as if it had been incurred in the succeeding taxable year in characterizing Fund distributions for any calendar year. A "qualified late year loss" includes:

- any net capital loss incurred after October 31 of the current taxable year, or, if there is no such loss, any net long-term capital loss or any net short-term capital loss incurred after October 31 of the current taxable year ("post-October capital losses"), and
- the sum of (1) the excess, if any, of (a) specified losses incurred after October 31 of the current taxable year, over (b) specified gains incurred after October 31 of the current taxable year and (2) the excess, if any, of (a) ordinary losses incurred after December 31 of the current taxable year, over (b) the ordinary income incurred after December 31 of the current taxable year.

The terms "specified losses" and "specified gains" mean ordinary losses and gains from the sale, exchange, or other disposition of property (including the termination of a position with respect to such property), foreign currency losses and gains, and losses and gains resulting from holding stock in a passive foreign investment company ("PFIC") for which a

mark-to-market election is in effect. The terms “ordinary losses” and “ordinary income” mean other ordinary losses and income that are not described in the preceding sentence.

**Undistributed Capital Gains.** The Fund may retain or distribute to shareholders its net capital gain for each taxable year. The Fund currently intends to distribute net capital gains. If the Fund elects to retain its net capital gain, the Fund will be taxed thereon (except to the extent of any available capital loss carryovers) at the applicable corporate tax rate. If the Fund elects to retain its net capital gain, it is expected that the Fund also will elect to have shareholders treated as if each received a distribution of its pro rata share of such gain, with the result that each shareholder will be required to report its pro rata share of such gain on its tax return as long-term capital gain, will receive a refundable tax credit for its pro rata share of tax paid by the Fund on the gain, and will increase the tax basis for its shares by an amount equal to the deemed distribution less the tax credit.

## **B. Fund Distributions**

Each distribution by the Fund will be treated in the manner described below regardless of whether the distribution is paid in cash or reinvested in additional shares of the Fund (or of another Fund). If the shareholder receives a distribution in the form of a reinvestment in additional shares, the shareholder will be treated as having received a distribution in an amount equal to the fair market value of the shares received, determined as of the reinvestment date.

**Distributions of Net Investment Income.** The Fund anticipates distributing substantially all of its investment company taxable income for each taxable year. The Fund receives income generally in the form of dividends and/or interest on its investments. The Fund may also recognize ordinary income from other sources, including, but not limited to, certain gains on foreign currency-related transactions. This income, less expenses incurred in the operation of the Fund, constitutes the Fund’s net investment income from which dividends may be paid to you. If a shareholder is a taxable investor, these distributions generally will be taxable to the shareholder as ordinary income to the extent of the Fund’s earnings and profits.

**Qualified Dividend Income for Individuals.** A portion of the Fund’s distributions may be treated as “qualified dividend income,” taxable to individuals and certain other non-corporate shareholders at maximum federal tax rates of 15% or 20%, depending on a shareholder’s level of taxable income and the shareholder’s filing status. A distribution is treated as qualified dividend income by a shareholder to the extent that (1) the Fund receives dividend income from taxable domestic corporations and certain qualified foreign corporations, provided that holding period and certain other requirements are met, and (2) the shareholder meets those requirements with respect to Fund shares on which the distribution is paid. To the extent that the Fund’s distributions are attributable to other sources, such as interest or capital gains, the distributions will not be treated as qualified dividend income. The Fund’s distributions of dividends that it receives from U.S. real estate investment trusts, derivatives, fixed income securities, and PFICs generally will not constitute qualified dividend income.

**Dividends-Received Deduction for Corporations.** For corporate shareholders, a portion of the dividends paid by the Fund may qualify for the 50% corporate dividends-received deduction. The portion of dividends paid by the Fund that so qualifies will be reported by the Fund to shareholders each year and cannot exceed the gross amount of dividends received by the Fund from domestic (U.S.) corporations. The availability of the dividends-received deduction is subject to certain holding period and debt financing restrictions that apply to both the Fund and the investor. Specifically, the amount that the Fund may report as eligible for the dividends-received deduction will be reduced or eliminated if the shares on which the dividends earned by the Fund were debt-financed or held by the Fund for less than a minimum period of time, generally 46 days during a 91-day period beginning 45 days before the stock becomes ex-dividend. Similarly, if your Fund shares are debt-financed or held by you for less than a 46-day period then the dividends-received deduction for Fund dividends on your shares may also be reduced or eliminated. Even if reported as dividends eligible for the dividends-received deduction, all dividends (including any deducted portion) must be included in your alternative minimum taxable income calculation. (Under 2017 legislation commonly known as the Tax Cuts and Jobs Act, corporations are no longer subject to the AMT for taxable years of the corporation beginning after December 31, 2017.) Income derived by the Fund from investments in derivatives, fixed income and foreign securities generally is not eligible for this treatment.

**Distributions of Capital Gains.** The Fund anticipates distributing substantially all of its net capital gain (after reduction for any capital loss carryovers, *i.e.*, unutilized capital losses from prior taxable years) for each taxable year. These distributions generally will be made only once a year, usually in December, but the Fund may make additional distributions of net capital gain at any time during the year. The Fund may derive capital gain and loss in connection with sales or other dispositions of its portfolio securities. Distributions derived from the excess of net short-term capital gain over net long-term capital loss will be taxable to you as ordinary income. Distributions paid from the excess of net long-term capital gain over net short-term capital loss will be taxable to you as long-term capital gain, regardless of how long you have held your shares in the

Fund. These distributions will not qualify for the corporate dividends-received deduction or as qualified dividend income for non-corporate shareholders.

**Return of Capital.** A distribution by the Fund that does not constitute an ordinary income dividend or capital gain dividend will be treated as a return of capital. A return of capital distribution will reduce the shareholder's tax basis of shares and will be treated as gain from the sale of the shares to the extent the basis would be reduced below zero. Return of capital distributions can occur for a number of reasons, including, among others, the Fund over-estimates the income to be received from certain investments.

**Capital Loss Carryovers.** The capital losses of the Fund, if any, do not flow through to shareholders. Rather, the Fund may use its capital losses, subject to applicable limitations, to offset its capital gains without being required to pay taxes on or distribute to shareholders such gains that are offset by the losses. If the Fund has a "net capital loss" (that is, capital losses in excess of capital gains), the excess (if any) of the Fund's net short-term capital losses over its net long-term capital gains is treated as a short-term capital loss arising on the first day of the Fund's next taxable year, and the excess (if any) of the Fund's net long-term capital losses over its net short-term capital gains is treated as a long-term capital loss arising on the first day of the Fund's next taxable year. Any such net capital losses of the Fund that are not used to offset capital gains may be carried forward indefinitely to reduce any future capital gains realized by the Fund in succeeding taxable years. All capital loss carryovers are listed in the Fund's financial statements.

The amount of capital losses that can be carried forward and used in any single year is subject to an annual limitation if there is a more than 50% "change in ownership" of the Fund. An ownership change generally results when shareholders owning 5% or more of the Fund increase their aggregate holdings by more than 50% over a three-year look-back period. An ownership change could result in capital loss carryovers being used at a slower rate, thereby reducing the Fund's ability to offset capital gains with those losses. An increase in the amount of taxable gains distributed to the Fund's shareholders could result from an ownership change. The Fund undertakes no obligation to avoid or prevent an ownership change, which can occur in the normal course of shareholder purchases and redemptions or as a result of engaging in a tax-free reorganization with another fund. Moreover, because of circumstances beyond the Fund's control, there can be no assurance that the Fund will not experience, or has not already experienced, an ownership change. Additionally, if the Fund engages in a tax-free reorganization with another fund, the effect of these and other rules not discussed herein may be to disallow or postpone the use by the Fund of its capital loss carryovers (including any current year losses and built-in losses when realized) to offset its own gains or those of the other fund, or vice versa, thereby reducing the tax benefits Fund shareholders would otherwise have enjoyed from use of such capital loss carryovers.

**Impact of Realized but Undistributed Income and Gains, and Net Unrealized Appreciation of Portfolio Securities.**

When a shareholder purchases shares, the NAV of their shares may reflect undistributed net investment income, undistributed capital gains or net unrealized appreciation in the value of the assets of the Fund. A distribution of that income or gain (including net gain, if any, from realizing all or part of that appreciation) will be taxable to a shareholder in the manner described above, although the distribution economically constitutes a partial return of capital to the shareholder unless the shareholder is investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. The Fund may be able to reduce the amount of such distributions from capital gains by utilizing its capital loss carryovers, if any.

**Dividends Declared in December and Paid in January.** Ordinarily, a shareholder is required to take distributions by the Fund into income in the year in which they are made. A distribution declared in October, November or December of any year and payable to shareholders of record on a specified date in one of those months, however, is deemed to be paid by the Fund and received by them on December 31 of that year if the distribution is paid in January of the following year.

**Annual Statements.** The Fund will send information annually to its shareholders regarding the federal income tax status of distributions made (or deemed made) during the year.

**Medicare Tax.** An individual is required to pay a 3.8% federal tax on the lesser of (1) the individual's "net investment income," which generally includes dividends, interest and net gains from the disposition of investment property (including dividends and capital gain distributions the Fund pays and net gains realized on the redemption or other taxable disposition of Fund shares) reduced by the deductions properly allocable to such income, or (2) the excess of the individual's "modified adjusted gross income" over a threshold amount (\$250,000 for married persons filing jointly and \$200,000 for single taxpayers). This tax is in addition to any other taxes due on that income. A similar tax applies to estates and trusts. This Medicare tax, if applicable, is reported by you on, and paid with, your federal income tax return. Shareholders should consult their tax advisors regarding the effect, if any, this provision may have on their investment in Fund shares.

**Pass Through of Foreign Tax Credits.** If more than 50% of the Fund's total assets at the end of a fiscal year is invested in foreign securities, the Fund may elect to pass through to you your pro rata share of foreign taxes paid by the Fund. If this election is made, the Fund may report more taxable income to you than it actually distributes. You will then be entitled either to deduct your share of these taxes in computing your taxable income, or to claim a foreign tax credit for these taxes against your U.S. federal income tax (subject to limitations for certain shareholders). The Fund will provide you with the information necessary to claim this deduction or credit on your personal income tax return if it makes this election. No deduction for foreign tax may be claimed by a noncorporate shareholder who does not itemize deductions or who is subject to the alternative minimum tax. Shareholders may be unable to claim a credit for the full amount of their proportionate shares of the foreign income tax paid by the Fund due to certain limitations that may apply. The Fund reserves the right not to pass through to its shareholders the amount of foreign income taxes paid by the Fund. Additionally, any foreign tax withheld on payments made "in lieu of" dividends or interest will not qualify for the pass through of foreign tax credits to shareholders.

### **C. Certain Tax Rules Applicable to Fund Transactions**

Set forth below is a general description of the tax treatment of certain types of securities, investment techniques and transactions that may apply to the Fund and, in turn, affect the amount, character and timing of dividends and distributions payable by a Fund to its shareholders. This section should be read in conjunction with the discussion above under "Investment Policies and Risks" for a detailed description of the various types of securities and investment techniques that apply to a Fund.

Certain of the Fund's investments in derivatives and foreign currency-denominated instruments, and the Fund's transactions in foreign currencies and hedging activities, may produce a difference between its book income and its taxable income. If the Fund's book income is less than the sum of its taxable income and net tax-exempt income (if any), the Fund could be required to make distributions exceeding book income to qualify as a regulated investment company. If the Fund's book income exceeds the sum of its taxable income and net tax-exempt income (if any), the distribution of any such excess will be treated as (i) a dividend to the extent of the Fund's remaining earnings and profits (including current earnings and profits arising from tax-exempt income, reduced by related deductions), (ii) thereafter, as a return of capital to the extent of the recipient's basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset.

**Investments in Foreign Currencies and Securities.** Gains or losses attributable to fluctuations in exchange rates that occur between the time that the Fund accrues interest, dividends or other receivables or accrues expenses or other liabilities denominated in a foreign currency and the time that the Fund actually collects such receivables or pays such liabilities are treated as ordinary income or ordinary losses. Similarly, gains or losses from the disposition of a foreign currency, or from the disposition of a fixed-income security, or a forward contract denominated in a foreign currency that are attributable to fluctuations in the value of the foreign currency between the date of acquisition of the asset and the date of its disposition, also are treated as ordinary income or ordinary losses. These gains or losses increase or decrease the amount of the Fund's investment company taxable income available to be distributed to its shareholders as ordinary income, rather than increasing or decreasing the amount of the Fund's net capital gain and may cause some or all of the Fund's previously distributed income to be classified as a return of capital.

**PFIC Investments.** If the Fund owns shares in a foreign corporation that constitutes a PFIC for federal income tax purposes and the Fund does not make either of the elections described in the next two paragraphs, it will be subject to federal income taxation on a portion of any "excess distribution" it receives from the PFIC or any gain it derives from the disposition of such shares, even if it distributes such income as a taxable dividend to its shareholders. The Fund may also be subject to additional interest charges in respect of deferred taxes arising from such distributions or gains. Any tax paid by the Fund as a result of its ownership of shares in a PFIC will not give rise to any deduction or credit to the Fund or to any shareholder. A PFIC is any foreign corporation (with certain exceptions) that, for the taxable year, either (1) derives at least 75% of its gross income for the taxable year from "passive income" (including interest, dividends, royalties, rents and annuities) or (2) on average, at least 50% of the value (or adjusted tax basis, if elected) of the assets it holds produce, or are held for the production of, "passive income." The Fund's distributions of income from any PFICs will not be eligible for the 15% or 20% maximum federal income tax rate on individuals' "qualified dividend income" described above.

The Fund could elect to "mark-to-market" stock in a PFIC. Under such an election, the Fund would include in gross income (and treat as ordinary income) at the end of the Fund's fiscal and excise tax years an amount equal to the excess, if any, of the fair market value of the PFIC stock as of the close of such year over the Fund's adjusted basis in the PFIC stock. The Fund would be allowed a deduction for the excess, if any, of that adjusted basis over that fair market value, but only to the extent of any net mark-to-market gains included by the Fund for prior taxable years. The Fund's adjusted basis in the PFIC stock would be adjusted to reflect the amounts included in, or deducted from, income under this election. Amounts so

included, as well as gain realized on the disposition of the PFIC stock, would be treated as ordinary income. The deductible portion of any mark-to-market loss, as well as loss realized on the disposition of the PFIC stock to the extent that such loss does not exceed the net mark-to-market gains previously included by the Fund, would be treated as ordinary loss. The Fund generally would not be subject to the deferred tax and interest charge provisions discussed above with respect to PFIC stock for which a mark-to-market election has been made. Foreign companies are not required to identify themselves as PFICs. Due to various complexities in identifying PFICs, the Fund can give no assurances that it will be able to identify portfolio securities in foreign corporations that are PFICs in time for the Fund to make a mark-to-market election.

If the Fund purchases shares in a PFIC and elects to treat the PFIC as a “qualified electing fund,” the Fund would be required to include in its income each year a portion of the ordinary income and net capital gains of the PFIC, even if the income and gains were not distributed to the Fund. Any such income would be subject to the Distribution Requirement and the calendar year Excise Tax distribution requirement described below. In most instances it will be very difficult, if not impossible, to make this election because some of the information required to make this election may not be easily obtainable.

Investors should be aware that the Fund may not be able, at the time it acquires a foreign corporation’s shares, to ascertain whether the corporation is a PFIC and that a foreign corporation may become a PFIC after the Fund acquires shares therein. While the Fund generally will seek not to invest in PFIC shares to avoid the tax consequences detailed above, there are no guarantees that it will be able to do so and it reserves the right to make such investments as a matter of its investment policy.

**Investments in Commodities —structured notes, corporate subsidiary and certain ETFs.** Gains from the disposition of commodities, including precious metals, will neither be considered qualifying income for purposes of satisfying the Income Requirement nor qualifying assets for purposes of satisfying the Asset Diversification Test. See “Qualification for Treatment as a Regulated Investment Company.” Also, the IRS has issued a revenue ruling which holds that income derived from commodity-linked swaps is not qualifying income for purposes of the Income Requirement. In a subsequent revenue ruling, as well as in a number of follow-on private letter rulings (upon which only the fund that received the private letter ruling may rely), the IRS provides that income from certain alternative investments which create commodity exposure, such as certain commodity index-linked or structured notes or a corporate subsidiary that invests in commodities, may be considered qualifying income under the Code. In September 2016, the IRS announced that it will no longer issue private letter rulings on questions relating to the treatment of a corporation as a RIC that require a determination of whether a financial instrument or position is a security under section 2(a)(36) of the 1940 Act. A financial instrument or position that constitutes a security under section 2(a)(36) of the 1940 Act generates qualifying income for a corporation taxed as a regulated investment company. This caused the IRS to consider revoking any rulings that required such a determination, some of which have been revoked prospectively as of a date agreed upon with the IRS. Accordingly, a fund may invest in certain commodity index-linked notes only to the extent it obtains an opinion of counsel confirming that income from such investments should be qualifying income. In addition, a fund may gain exposure to commodities through investment in QPTPs such as an exchange traded fund or ETF that is classified as a partnership or trust and which invests in commodities, or through investment in a wholly-owned subsidiary that is treated as a controlled foreign corporation for federal income tax purposes. However, in September 2016, the IRS issued proposed regulations that would require such a subsidiary to distribute its "Subpart F" income (defined in Section 951 of the Code to include passive income such as income from commodity-linked derivatives) each year in order for a RIC to treat that income as satisfying the Gross Income Requirement. Accordingly, the extent to which a fund invests in commodities or commodity-linked derivatives may be limited by the Gross Income Requirement and the Diversification Requirements, which the fund must continue to satisfy to maintain its status as a regulated investment company. A fund also may be limited in its ability to sell its investments in commodities, commodity-linked derivatives, and certain ETFs or be forced to sell other investments to generate income due to the Income Requirement. If a fund does not appropriately limit such investments or if such investments (or the income earned on such investments) were to be recharacterized for U.S. tax purposes, the fund could fail to qualify as a regulated investment company. In lieu of potential disqualification, a fund is permitted to pay a tax for certain failures to satisfy the Asset Diversification Test or Income Requirement, which, in general, are limited to those due to reasonable cause and not willful neglect.

**Investments in Convertible Debt Securities.** Convertible debt is ordinarily treated as a “single property” consisting of a pure debt interest until conversion, after which the investment becomes an equity interest. If the security is issued at a premium (*i.e.*, for cash in excess of the face amount payable on retirement), the creditor-holder may amortize the premium over the life of the bond. If the security is issued for cash at a price below its face amount, the creditor-holder must accrue original issue discount in income over the life of the debt. The creditor-holder’s exercise of the conversion privilege is treated as a nontaxable event. Mandatorily convertible debt (*e.g.*, an exchange traded note or ETN issued in the form of an unsecured obligation that pays a return based on the performance of a specified market index, exchange currency, or commodity) is often, but not always, treated as a contract to buy or sell the reference property rather than debt. Similarly,

convertible preferred stock with a mandatory conversion feature is ordinarily, but not always, treated as equity rather than debt. Dividends received generally are qualified dividend income and eligible for the corporate dividends-received deduction. In general, conversion of preferred stock for common stock of the same corporation is tax-free. Conversion of preferred stock for cash is a taxable redemption. Any redemption premium for preferred stock that is redeemable by the issuing company might be required to be amortized under original issue discount principles. A change in the conversion ratio or conversion price of a convertible security on account of a dividend paid to the issuer's other shareholders may result in a deemed distribution of stock to the holders of the convertible security equal to the value of their increased interest in the equity of the issuer. Thus, an increase in the conversion ratio of a convertible security can be treated as a taxable distribution of stock to a holder of the convertible security (without a corresponding receipt of cash by the holder) before the holder has converted the security.

**Investments in Securities of Uncertain Tax Character.** The Fund may invest in securities the U.S. federal income tax treatment of which may not be clear or may be subject to recharacterization by the IRS. To the extent the tax treatment of such securities or the income from such securities differs from the tax treatment expected by the Fund, it could affect the timing or character of income recognized by the Fund, requiring the Fund to purchase or sell securities, or otherwise change its portfolio, in order to comply with the tax rules applicable to RICs under the IRC. Moreover, because the tax rules applicable to derivative financial instruments are in some cases uncertain under current law, an adverse determination or future guidance by the IRS with respect to these rules (which determination or guidance could be retroactive) may affect whether the Fund has made sufficient distributions, and otherwise satisfied the relevant requirements, to maintain its qualification as a RIC and avoid a fund-level tax.

#### **D. Federal Excise Tax**

A 4% non-deductible federal excise tax ("Excise Tax") is imposed on a RIC that fails to distribute in each calendar year an amount equal to at least the sum of (1) 98.0% of its ordinary income for the calendar year plus (2) 98.2% of its capital gain net income for the one-year period ended on October 31 of such calendar year (or, at the election of a regulated investment company having a taxable year ending in November or December, for its taxable year), and (3) any prior year undistributed ordinary income and capital gain net income. The Fund will be treated as having distributed any amount on which it is subject to income tax for any taxable year ending in the calendar year.

For purposes of calculating the Excise Tax, the Fund (1) reduces its capital gain net income (but not below its net capital gain) by the amount of any net ordinary loss for the calendar year and (2) excludes any "specified gain" or "specified loss" (see, "Deferral of Late Year Losses" above for the definition of "specified gain" and "specified loss") realized or sustained after October 31 of any year in determining the amount of ordinary income for the current calendar year. The Fund will include any "specified gain" or "specified loss" incurred after October 31 in determining ordinary income for the succeeding calendar year.

Generally, the Fund intends to make sufficient distributions prior to the end of each calendar year to avoid any material liability for federal income and Excise Tax, but can give no assurances that all or a portion of such liability will be avoided. In addition, under certain circumstances, temporary timing or permanent differences in the realization of income and expense for book and tax purposes can result in the Fund having to pay an Excise Tax. Shareholders should note, however, that the Fund may in certain circumstances be required to liquidate portfolio investments to make sufficient distributions to avoid Excise Tax liability.

#### **E. Redemption of Shares**

In general, you will recognize gain or loss on a redemption of Fund shares in an amount equal to the difference between the proceeds of the redemption and your adjusted tax basis in the shares. All or a portion of any loss so recognized may be disallowed if you purchase Fund shares (for example, by reinvesting dividends) within 30 days before or after the redemption (*i.e.*, a wash sale). If disallowed, the loss would be reflected in an upward adjustment to the basis in the purchased shares. In general, any gain or loss arising from a redemption of shares of the Fund will be considered a capital gain or loss and will be long-term capital gain or loss if the shares were held for longer than one year. Any capital loss arising from a redemption of shares held for six months or less, however, will be treated as a long-term capital loss to the extent of the amount of distributions of net capital gain, if any, received on such shares. In determining the holding period of shares for this purpose, any period during which your risk of loss is offset by means of options, short sales or similar transactions is not counted. Capital losses in any year are deductible only to the extent of capital gains plus, in the case of a non-corporate taxpayer, \$3,000 of ordinary income.

**Tax Basis Information.** The Fund is required to report to you and the IRS annually on Form 1099-B the cost basis of shares purchased or acquired where the cost basis of the shares is known by the Fund (referred to as “covered shares”). However, cost basis reporting is not required for certain shareholders, including shareholders investing in the Fund through a tax-advantaged retirement account, such as a 401(k) plan or an individual retirement account.

When required to report cost basis, the Fund will calculate it using the Fund’s default method, unless you instruct the Fund to use a different calculation method. For additional information regarding the Fund’s available cost basis reporting methods, including its default method, please contact the Fund. If you hold your Fund shares through a broker (or other nominee), please contact that broker (nominee) with respect to reporting of cost basis and available elections for your account.

The IRS permits the use of several methods to determine the cost basis of mutual fund shares. The method used will determine which specific shares are deemed to be sold when there are multiple purchases on different dates at differing share prices, and the entire position is not sold at one time. The Fund does not recommend any particular method of determining cost basis, and the use of other methods may result in more favorable tax consequences for some shareholders. It is important that you consult with your tax advisor to determine which method is best for you and then notify the Fund if you intend to utilize a method other than the Fund’s default method for covered shares. If you do not notify the Fund of your elected cost basis method upon the initial purchase into your account, the default method will be applied to your covered shares.

The Fund will compute and report the cost basis of your Fund shares sold or exchanged by taking into account all of the applicable adjustments to cost basis and holding periods as required by the IRC and Treasury regulations for purposes of reporting these amounts to you and the IRS. However the Fund is not required to, and in many cases the Fund does not possess the information to, take all possible basis, holding period or other adjustments into account in reporting cost basis information to you. Therefore, shareholders should carefully review the cost basis information provided by the Fund.

**Reportable Transactions.** Under Treasury regulations, if a shareholder recognizes a loss with respect to the Fund’s shares of \$2 million or more for an individual shareholder or \$10 million or more for a corporate shareholder (or certain greater amounts over a combination of years), the shareholder must file with the IRS a disclosure statement on Form 8886. The fact that a loss is reportable under these regulations does not affect the legal determination of whether the taxpayer’s treatment of the loss is proper. Shareholders should consult their tax advisers to determine the applicability of these regulations in light of their individual circumstances.

## **F. State and Local Taxes**

The tax rules of the various states and their local jurisdictions with respect to an investment in the Fund can differ from the federal income tax rules described above. These state and local rules are not discussed herein. You are urged to consult your tax advisor as to the consequences of state and local tax rules with respect to an investment in the Fund.

## **G. Foreign Income Tax**

Investment income received by the Fund from sources within foreign countries and gains that it realizes on the disposition of foreign securities may be subject to foreign income taxes withheld at the source and the amount of tax withheld generally will be treated as an expense of the Fund. The United States has entered into tax treaties with many foreign countries that may entitle the Fund to a reduced rate of such taxes or exemption from taxes on such income. Some countries require the filing of a tax reclaim or other forms to receive the benefit of the reduced tax rate; whether or when the Fund will receive the tax reclaim is within the control of the individual country. Information required on these forms may not be available such as shareholder information therefore, the Fund may not receive the reduced treaty rates or potential reclaims. Other countries have conflicting and changing instructions and restrictive timing requirements which may cause the Fund not to receive the reduced treaty rates or potential reclaims. Other countries may subject capital gains realized by the Fund on sale or disposition of securities of that country to taxation. It is impossible to know the effective rate of foreign tax in advance, since the amount of the Fund’s assets to be invested within various countries cannot be determined. Under certain circumstances, the Fund may elect to pass-through the amount of foreign taxes paid by the Fund to shareholders, although it reserves the right not to do so. If the Fund makes such an election and obtains a refund of foreign taxes paid by the Fund in a prior year, the Fund may be eligible to reduce the amount of foreign taxes reported by the Fund to its shareholders, generally by the amount of the foreign taxes refunded, for the year in which the refund is received.

## **H. Backup Withholding**

By law, the Fund may be required to withhold a portion of your taxable dividends and sales proceeds unless you:

- provide your correct social security or taxpayer identification number,
- certify that this number is correct,
- certify that you are not subject to backup withholding, and
- certify that you are a U.S. person (including a U.S. resident alien).

The Fund also must withhold if the IRS instructs it to do so. When withholding is required, the amount will be 24% of any distributions or proceeds paid. Backup withholding is not an additional tax. Any amounts withheld may be credited against the shareholder's U.S. federal income tax liability, provided the appropriate information is furnished to the IRS. Certain payees and payments are exempt from backup withholding and information reporting.

## **I. Non-U.S. Investors**

Fund shares generally are not sold outside the United States. However, non-U.S. investors (shareholders who, as to the U.S., are nonresident alien individuals, foreign trusts or estates, foreign corporations, or foreign partnerships) may be subject to U.S. withholding and estate tax and are subject to special U.S. tax certification requirements. Non-U.S. investors should consult their tax advisors about the applicability of U.S. tax withholding and the use of the appropriate forms to certify their status.

**In general.** Non-U.S. investors may be subject to U.S. withholding tax at a 30% or lower treaty rate and U.S. estate tax and are subject to special U.S. tax certification requirements to avoid backup withholding and claim any treaty benefits. Exemptions from U.S. withholding tax are provided for certain capital gain dividends paid by a Fund from net long-term capital gains, interest-related dividends and short-term capital gain dividends, if such amounts are reported by a Fund. However, notwithstanding such exemptions from U.S. withholding at the source, any such dividends and distributions of income and capital gains will be subject to backup withholding at a rate of 24% if you fail to properly certify that you are not a U.S. person.

**Foreign Account Tax Compliance Act ("FATCA").** Under the FATCA, a Fund will be required to withhold a 30% tax on the following payments or distributions made by the Fund to certain foreign entities, referred to as foreign financial institutions or nonfinancial foreign entities, that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts: (a) income dividends and (b) after Dec. 31, 2018, certain capital gain distributions, return of capital distributions and the proceeds arising from the sale of Fund shares. A Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA or similar laws. Withholding also may be required if a foreign entity that is a shareholder of a Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

**In general.** Non-U.S. investors may be subject to U.S. withholding tax at a 30% or lower treaty rate and U.S. estate tax and are subject to special U.S. tax certification requirements to avoid backup withholding and claim any treaty benefits. Exemptions from U.S. withholding tax are provided for certain capital gain dividends paid by a Fund from net long-term capital gains, interest-related dividends and short-term capital gain dividends, if such amounts are reported by a Fund. However, notwithstanding such exemptions from U.S. withholding at the source, any such dividends and distributions of income and capital gains will be subject to backup withholding at a rate of 28% if you fail to properly certify that you are not a U.S. person.

**Foreign Account Tax Compliance Act ("FATCA").** Under the FATCA, a Fund will be required to withhold a 30% tax on the following payments or distributions made by the Fund to certain foreign entities, referred to as foreign financial institutions or nonfinancial foreign entities, that fail to comply (or be deemed compliant) with extensive reporting and withholding requirements designed to inform the U.S. Department of the Treasury of U.S.-owned foreign investment accounts: (a) income dividends and (b) after Dec. 31, 2018, certain capital gain distributions, return of capital distributions and the proceeds arising from the sale of Fund shares. A Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA or similar laws. Withholding also may be required if a foreign entity that is a shareholder of a Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

## OTHER MATTERS

---

### A. The Trust and Its Shareholders

**General Information.** The Fund is a separate series of the Trust. The Trust is an open-end investment management company organized under Delaware law as a statutory trust on July 30, 2012. The Trust's trust instrument (the "Trust Instrument") permits the Trust to offer separate series ("funds") of shares of beneficial interest ("shares"). The Trust reserves the right to create and issue shares of additional funds. The Trust and each fund will continue indefinitely until terminated. Each fund is a separate mutual fund, and each share of each fund represents an equal proportionate interest in that fund. All consideration received by the Trust for shares of any fund and all assets of such fund belong solely to that fund and would be subject to liabilities related thereto. The other funds of the Trust are described in one or more separate Statements of Additional Information.

**Shareholder Voting and Other Rights.** Each share of a fund and each class of shares has equal dividend, distribution, liquidation and voting rights. Fractional shares have those rights proportionately, except that expenses related to the distribution of shares of each fund or class (and certain other expenses such as transfer agency, shareholder service and administration expenses) are borne solely by those shares. Each fund or class votes separately with respect to the provisions of any Rule 12b-1 plan that pertains to the fund or class and other matters for which separate fund or class voting is appropriate under applicable law. Generally, shares will be voted separately by each fund except if: (1) the 1940 Act requires shares to be voted in the aggregate and not by individual funds; or (2) the Board determines that the matter affects more than one fund and all affected funds must vote. The Board may also determine that a matter only affects certain funds or classes of the Trust and thus that only those funds or classes are entitled to vote on the matter. Delaware law does not require the Trust to hold annual meetings of shareholders, and it is anticipated that shareholder meetings will be held only when specifically required by federal or state law. There are no conversion or preemptive rights in connection with shares of the Trust.

All shares, when issued in accordance with the terms of the offering, will be fully paid and non-assessable.

A shareholder in a fund is entitled to the shareholder's pro rata share of all distributions arising from that fund's assets and, upon redeeming shares, will receive the portion of the fund's net assets represented by the redeemed shares.

Shareholders representing 10% or more of the Trust's (or a fund's) shares may, as set forth in the Trust Instrument, call meetings of the Trust (or fund) for any purpose related to the Trust (or fund), including, in the case of a meeting of the Trust, the purpose of voting on removal of one or more trustees.

**Termination or Reorganization of Trust or its Series.** The Board, may, without prior shareholder approval, change the form of organization of the Trust by merger, consolidation or incorporation, so long as the surviving entity is an open-end management investment company. Under the Trust Instrument, the trustees may also, without shareholder vote, sell and convey all or substantially all of the assets of the Trust to another trust, partnership, association or corporation, or cause the Trust to incorporate in the State of Delaware, so long as the surviving entity is an open-end management investment company that will succeed to or assume the Trust's registration statement.

Under the Trust Instrument, the Board may sell or convey the assets of a fund or reorganize such fund into another investment company registered under the 1940 Act without a shareholder vote.

### B. Fund Ownership

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is a shareholder who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledges the existence of control. Shareholders owning voting securities in excess of 25% may determine the outcome of any matter affecting and voted on by shareholders of the Fund.

As of March 5, 2018, the trustees and officers of the Trust in aggregate owned less than 1% of the outstanding shares of beneficial interest of the Fund.

As of March 5, 2018, certain shareholders listed in Table 6 in Appendix B owned of record or beneficially 5% or more of the shares of the Fund.

From time to time, certain shareholders may own a large percentage of the shares of the Fund. Accordingly, those shareholders may be able to greatly affect (if not determine) the outcome of a shareholder vote. As of March 5, 2018, the shareholders

listed in Table 6 in Appendix B who own more than 25% of the Fund may be deemed to control the Fund. “Control” for this purpose is the ownership of 25% or more of the Fund’s voting securities.

### **C. Limitations on Shareholders’ and Trustees’ Liability**

Delaware law provides that Fund shareholders are entitled to the same limitations of personal liability extended to stockholders of private corporations for profit. In addition, the Trust Instrument contains an express disclaimer of shareholder liability for the debts, liabilities, obligations and expenses of the Trust. The Trust Instrument provides that if any shareholder or former shareholder of any fund is held personally liable, solely by reason of having been a shareholder (and not because of their acts or omissions or for some other reason), the shareholder or former shareholder shall be entitled out of assets belonging to the applicable fund to be held harmless from and indemnified against all losses and expenses arising from such liability. The Trust Instrument also provides that the Trust, on behalf of a fund, shall, upon request by a shareholder or former shareholder, assume the defense of any claim made against any shareholder for any act or obligation of that fund and satisfy any judgment thereon from the assets belonging to the fund. Thus, the risk of a shareholder incurring financial loss on account of shareholder liability is limited to circumstances in which Delaware law does not apply, no contractual limitation of liability is in effect, and the Fund is unable to meet its obligations.

No trustee or officer of the Trust is responsible or liable to the Trust, its shareholders or another trustee or other person that is a party to or is otherwise bound by the Trust’s Trust Instrument for any act or omission, breach of contract, breach of duties or for neglect or wrongdoing of the Trustee or officer or any officer, agent, representative, employee, adviser, principal underwriter or independent contractor to the Trust. However, no trustee or officer is protected under the Trust Instrument against liability to the Trust or its shareholders to which such trustee or officer would otherwise be subject by reason of willful misfeasance, bad faith, gross negligence or reckless disregard of their duties.

All persons contracting with or having a claim against the Trust or a particular fund may only look to the Trust assets (or assets belonging to a fund) for payment under such contract or claim. Neither the trustees nor any of the Trust’s officers or employees (whether past, present or future) are personally liable for such claims.

### **D. Proxy Voting Procedures**

Copies of the proxy voting procedures of the Trust, the Adviser and the Subadviser are included in Appendices B and C.

Information regarding how the Fund voted proxies relating to portfolio securities during the 12-month period ended June 30 will be available: (1) without charge, upon request, by contacting the Transfer Agent at (855) 328-7691 (toll free); and (2) on the SEC’s website at [www.sec.gov](http://www.sec.gov).

### **E. Code of Ethics**

The Trust and the Adviser have each adopted a code of ethics under Rule 17j-1 of the 1940 Act. These codes of ethics permit, subject to certain conditions, personnel of each of those entities to invest in securities that may be purchased or held by the Fund. The Distributor relies on the principal underwriters exception under Rule 17j-1(c)(3), specifically where the Distributor is not affiliated with the Trust or the Adviser, and no officer, director or general partner of the Distributor serves as an officer, director or general partner of the Trust or the Adviser.

### **F. Registration Statement**

This SAI and the Prospectus do not contain all of the information included in the Trust’s registration statement filed with the SEC under the 1933 Act with respect to the securities offered hereby. The registration statement, including the exhibits filed therewith, may be examined at the office of the SEC in Washington, D.C. The SEC maintains a website ([www.sec.gov](http://www.sec.gov)) that contains this SAI, any material incorporated by reference, and other information regarding the Fund.

### **G. Financial Statements**

The Fund’s Financial Statements and Financial Highlights for the fiscal year ended November 30, 2017 are incorporated by reference into this SAI from the Fund’s Annual Report to shareholders, have been audited by BBD, as stated in its report, which is incorporated herein by reference, and have been so incorporated in reliance upon reports of such firm, given upon its authority as an expert in accounting and auditing.

## APPENDIX A – DESCRIPTION OF SECURITIES RATINGS

---

### Corporate and Municipal Long-Term Bond Ratings

Standard & Poor's ("S&P") Corporate and Municipal Long-Term Bond Ratings:

*The following descriptions of S&P's long-term corporate and municipal bond ratings have been published by Standard & Poor's Financial Service LLC.*

**AAA** - An obligation rated 'AAA' has the highest rating assigned by S&P. The obligor's capacity to meet its financial commitment on the obligation is extremely strong.

**AA** - An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitment on the obligation is very strong.

**A** - An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong.

**BBB** - An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

**BB, B, CCC, CC, and C** - Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposures to adverse conditions.

**BB** - An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions which could lead to the obligor's inadequate capacity to meet its financial commitment on the obligation.

**B** - An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitment on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitment on the obligation.

**CCC** - An obligation rated 'CCC' is currently vulnerable to nonpayment, and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitment on the obligation.

**CC** - An obligation rated 'CC' is currently highly vulnerable to nonpayment. The 'CC' rating is used when a default has not yet occurred, but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

**C** - An obligation rated 'C' is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared to obligations that are rated higher.

**D** - An obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

**Plus (+) or Minus (-)** - The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

**NR** - This indicates that no rating has been requested, that there is insufficient information on which to base a rating, or that S&P Global Ratings does not rate a particular obligation as a matter of policy.

Moody's Investors Service, Inc. ("Moody's") Long-Term Corporate Bond Ratings:

*The following descriptions of Moody's long-term corporate bond ratings have been published by Moody's Investors Service, Inc. and Moody's Analytics Inc.*

**Aaa** - Obligations rated Aaa are judged to be of the highest quality, with minimal credit risk.

**Aa** - Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

**A** - Obligations rated A are considered upper-medium grade and are subject to low credit risk.

**Baa** - Obligations rated Baa are subject to moderate credit risk. They are considered medium-grade and as such may possess speculative characteristics.

**Ba** - Obligations rated Ba are judged to have speculative elements and are subject to substantial credit risk.

**B** - Obligations rated B are considered speculative and are subject to high credit risk.

**Caa** - Obligations rated Caa are judged to be of poor standing and are subject to very high credit risk.

**Ca** - Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery in principal and interest.

**C** - Obligations rated C are the lowest rated class of bonds and are typically in default, with little prospect for recovery of principal or interest.

Modifiers: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Moody's U.S. Municipal Long-Term Bond Ratings:

*The following descriptions of Moody's long-term municipal bond ratings have been published by Moody's Investors Service, Inc. and Moody's Analytics Inc.*

**Aaa** - Issuers or issues rated Aaa demonstrate the strongest creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**Aa** - Issuers or issues rated Aa demonstrate very strong creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**A** - Issuers or issues rated A present above-average creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**Baa** - Issuers or issues rated Baa represent average creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**Ba** - Issuers or issues rated Ba demonstrate below-average creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**B** - Issuers or issues rated B demonstrate weak creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**Caa** - Issuers or issues rated Caa demonstrate very weak creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

**Ca** - Issuers or issues rated Ca demonstrate extremely weak creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

C - Issuers or issues rated C demonstrate the weakest creditworthiness relative to other U.S. municipal or tax-exempt issuers or issues.

Modifiers: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating category from Aa through Caa. The modifier 1 indicates that the issuer or obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Fitch Ratings Ltd. ("Fitch") Corporate Bond Ratings:

*The following descriptions of Fitch's long-term corporate bond ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.*

**AAA** - Highest credit quality. 'AAA' ratings denote the lowest expectation of credit risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

**AA** - Very high credit quality. 'AA' ratings denote expectations of very low credit risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

**A** - High credit quality. 'A' ratings denote expectations of low credit risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

**BBB** - Good credit quality. 'BBB' ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

**BB** - Speculative. 'BB' ratings indicate an elevated vulnerability to credit risk, particularly in the event of adverse changes in business or economic conditions over time; however, business or financial alternatives may be available to allow financial commitments to be met.

**B** - Highly speculative. 'B' ratings indicate that material credit risk is present. For performing obligations, default risk is commensurate with the issuer being rated with an Issuer Default Risk ("IDR") in the ranges 'BB' to 'C'. For issuers with an IDR below 'B', the overall credit risk of this obligation is moderated by the expected level of recoveries should a default occur. For issuers with an IDR above 'B', the overall credit risk of this obligation is exacerbated by the expected low level of recoveries should a default occur. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, but the rated obligation is expected to have extremely high recovery rates consistent with a Recovery Rating of 'RR1' (outstanding recovery prospects given default).

**CCC** - Substantial credit risk. 'CCC' ratings indicate that substantial credit risk is present. For performing obligations, default risk is commensurate with an IDR in the ranges 'B' to 'C'. For issuers with an IDR below 'CCC', the overall credit risk of this obligation is moderated by the expected level of recoveries should a default occur. For issuers with an IDR above 'CCC', the overall credit risk of this obligation is exacerbated by the expected low level of recoveries should a default occur. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, but the rated obligation is expected to have a superior recovery rate consistent with a Recovery Rating of 'RR2' (superior recovery prospects given default).

**CC** - Very high levels of credit risk. 'CC' ratings indicate very high levels of credit risk. For performing obligations, default risk is commensurate with an IDR in the ranges 'B' to 'C'. For issuers with an IDR below 'CC', the overall credit risk of this obligation is moderated by the expected level of recoveries should a default occur. For issuers with an IDR above 'CC', the overall credit risk of this obligation is exacerbated by the expected low level of recoveries should a default occur. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, but the rated obligation is expected to have a good recovery rate consistent with a Recovery Rating of 'RR3' (good recovery prospects given default).

**C** - Exceptionally high levels of credit risk. 'C' indicates exceptionally high levels of credit risk. For performing obligations, default risk is commensurate with an IDR in the ranges 'B' to 'C'. The overall credit risk of this obligation is exacerbated by the expected low level of recoveries should a default occur. For non-performing obligations, the obligation or issuer is in default, or has deferred payment, and the rated obligation is expected to have an average, below-average or poor recovery

rate consistent with a Recovery Rating of ‘RR4’ (average recovery prospects given default), ‘RR5’ (below average recovery prospects given default) or ‘RR6’ (poor recovery prospects given default).

Defaulted obligations typically are not assigned ‘RD’ or ‘D’ ratings, but are instead rated in the ‘B’ to ‘C’ rating categories, depending upon their recovery prospects and other relevant characteristics. This approach better aligns obligations that have comparable overall expected loss but varying vulnerability to default and loss.

**Plus (+) or Minus (-)** The modifiers “+” or “-” may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the ‘AAA’ obligation rating category, or to corporate finance obligation ratings in the categories below ‘B’.

The terms “investment grade” and “speculative grade” have established themselves over time as shorthand to describe the categories ‘AAA’ to ‘BBB’ (investment grade) and ‘BB’ to ‘D’ (speculative grade). The terms “investment grade” and “speculative grade” are market conventions, and do not imply any recommendation or endorsement of a specific security for investment purposes. “Investment grade” categories indicate relatively low to moderate credit risk, while ratings in the “speculative” categories either signal a higher level of credit risk or that a default has already occurred.

#### Fitch’s Municipal Bond Long-Term Ratings:

*The following descriptions of Fitch’s long-term municipal bond ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.*

**AAA** - Highest credit quality. ‘AAA’ ratings denote the lowest expectation of default risk. They are assigned only in cases of exceptionally strong capacity for payment of financial commitments. This capacity is highly unlikely to be adversely affected by foreseeable events.

**AA** - Very high credit quality. ‘AA’ ratings denote expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

**A** - High credit quality. ‘A’ ratings denote expectations of low default risk. The capacity for payment of financial commitments is considered strong. This capacity may, nevertheless, be more vulnerable to adverse business or economic conditions than is the case for higher ratings.

**BBB** - Good credit quality. ‘BBB’ ratings indicate that expectations of credit risk are currently low. The capacity for payment of financial commitments is considered adequate but adverse business or economic conditions are more likely to impair this capacity.

**BB** - Speculative. ‘BB’ ratings indicate an elevated vulnerability to default risk, particularly in the event of adverse changes in business or economic conditions over time.

**B** - Highly speculative. ‘B’ ratings indicate that material default risk is present, but a limited margin of safety remains. Financial commitments are currently being met; however, capacity for continued payment is vulnerable to deterioration in the business and economic environment.

**CCC** - Substantial credit risk. ‘CCC’ ratings indicate that default is a real possibility.

**CC** - Very high levels of credit risk. ‘CC’ ratings indicate default of some kind appears probable.

**C** - Exceptionally high levels of credit risk. ‘C’ ratings indicate default appears imminent or inevitable.

**D** - Default. ‘D’ ratings indicate a default. Default generally is defined as one of the following:

- failure to make payment of principal and/or interest under the contractual terms of the rated obligation;
- the bankruptcy filings, administration, receivership, liquidation or other winding-up or cessation of the business of an issuer/obligor; or
- the distressed exchange of an obligation, where creditors were offered securities with diminished structural or economic terms compared with the existing obligation.

**Structured Finance Defaults** – “Imminent” default, categorized under ‘C’, typically refers to the occasion where a payment default has been intimated by the issuer, and is all but inevitable. Another alternative would be where an issuer has formally announced a distressed debt exchange, but the date of the exchange still lies several days or weeks in the immediate future.

Additionally, in structured finance transactions, where analysis indicates that an instrument is irrevocably impaired such that it is not expected to pay interest and/or principal in full in accordance with the terms of the obligation’s documentation during the life of the transaction, but where no payment default in accordance with the terms of the documentation is imminent, the obligation will typically be rated in the ‘C’ category.

**Structured Finance Writedowns** - Where an instrument has experienced an involuntary and, in the agency’s opinion, irreversible “writedown” of principal (*i.e.* other than through amortization, and resulting in a loss to the investor), a credit rating of ‘D’ will be assigned to the instrument. Where the agency believes the “writedown” may prove to be temporary (and the loss may be “written up” again in future if and when performance improves), then a credit rating of ‘C’ will typically be assigned. Should the “writedown” then later be reversed, the credit rating will be raised to an appropriate level for that instrument. Should the “writedown” later be deemed as irreversible, the credit rating will be lowered to ‘D’.

Notes: In the case of structured and project finance, while the ratings do not address the loss severity given default of the rated liability, loss severity assumptions on the underlying assets are nonetheless typically included as part of the analysis. Loss severity assumptions are used to derive pool cash flows available to service the rated liability.

**Plus (+) or Minus (-)** - The modifiers “+” or “-” may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the ‘AAA’ Long-Term Rating category, or to Long-Term Rating categories below ‘B’.

### **Municipal Short-Term Bond Ratings**

#### S&P’s Municipal Short-Term Bond Ratings:

*The following descriptions of S&P’s short-term municipal ratings have been published by Standard & Poor’s Financial Service LLC.*

**SP-1** - Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

**SP-2** - Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

**SP-3** - Speculative capacity to pay principal and interest.

#### Moody’s Municipal Short-Term Ratings:

*The following descriptions of Moody’s short-term municipal ratings have been published by Moody’s Investors Service, Inc. and Moody’s Analytics Inc.*

**MIG 1** - This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

**MIG 2** - This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

**MIG 3** - This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

**SG** - This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

### Fitch's Municipal Short-Term Credit Ratings:

*The following descriptions of Fitch's municipal short-term credit ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.*

**F1** - Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

**F2** - Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

**F3** - Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

**B** - Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

**C** - High short-term default risk. Default is a real possibility.

**RD** - Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically, applicable to entity ratings only.

**D** - Default. Indicates a broad-based default event for an entity, or the default of a short-term obligation.

### **Short-Term Credit Ratings**

#### S&P's Short-Term Credit Ratings:

*The following descriptions of S&P's short-term credit ratings have been published by Standard & Poor's Financial Service LLC.*

**A-1** - A short-term obligation rated 'A-1' is rated in the highest category by S&P Global Ratings. The obligor's capacity to meet its financial commitment on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong.

**A-2** - A short-term obligation rated 'A-2' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor's capacity to meet its financial commitment on the obligation is satisfactory.

**A-3** - A short-term obligation rated 'A-3' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation.

**B** - A short-term obligation rated 'B' is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties which could lead to the obligor's inadequate capacity to meet its financial commitments.

**C** - A short-term obligation rated 'C' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitment on the obligation.

**D** - A short-term obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

**Dual Ratings** – Dual ratings may be assigned to debt issues that have a put option or demand feature. The first component of the rating addresses the likelihood of repayment of principal and interest as due, and the second component of the rating addresses only the demand feature. The first component of the rating can relate to either a short-term or long-term

transaction and accordingly use either short-term or long-term rating symbols. The second component of the rating relates to the put option and is assigned a short-term rating symbol (for example, 'AAA/A-1+' or 'A-1+/A-1'). With U.S. municipal short-term demand debt, the U.S. municipal short-term note rating symbols are used for the first component of the rating (for example, 'SP-1+/A-1+').

Moody's Short-Term Ratings:

*The following descriptions of Moody's short-term credit ratings have been published by Moody's Investors Service, Inc. and Moody's Analytics Inc.*

**P-1** - Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

**P-2** - Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

**P-3** - Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

**NP** - Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Fitch's Short-Term Ratings:

*The following descriptions of Fitch's short-term credit ratings have been published by Fitch, Inc. and Fitch Ratings Ltd.*

**F1** - Highest short-term credit quality. Indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

**F2** - Good short-term credit quality. Good intrinsic capacity for timely payment of financial commitments.

**F3** - Fair short-term credit quality. The intrinsic capacity for timely payment of financial commitments is adequate.

**B** - Speculative short-term credit quality. Minimal capacity for timely payment of financial commitments, plus heightened vulnerability to near term adverse changes in financial and economic conditions.

**C** - High short-term default risk. Default is a real possibility.

**RD** - Restricted default. Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Typically, applicable to entity ratings only.

**D** - Default. Indicates a broad-based default event for an entity, or the default of a specific short-term obligation.

The modifiers "+" or "-" may be appended to a rating to denote relative status within major rating categories. Such suffixes are not added to the 'AAA' Long-term rating category, to categories below 'CCC', or to Short-term ratings other than 'F1'. (The +/- modifiers are only used to denote issues within the CCC category, whereas issuers are only rated CCC without the use of modifiers.)

**APPENDIX B – MISCELLANEOUS TABLES****Table 1 – Investment Advisory Fees**

The following table shows the dollar amount of fees accrued with respect to the Fund, the amount of fees waived and/or expenses reimbursed by the Adviser, if any, and the actual fees retained by the Adviser. The Adviser generally compensates the Subadviser from the actual advisory fees retained by the Adviser. The data is for the last three fiscal years.

<b>Year Ended</b>	<b>Advisory Fees Accrued</b>	<b>Advisory Fees Waived and/or Expenses Reimbursed</b>	<b>Advisory Fees Received</b>
November 30, 2017	\$240,266	\$92,747	\$147,519
November 30, 2016	\$206,782	\$94,900	\$111,882
November 30, 2015	\$242,304	\$98,788	\$143,516

**Table 2 – Distribution Fees (Investor Shares)**

The following table shows the dollar amount of the fees accrued by the applicable class, pursuant to the 12b-1 Distribution Plan, the amount of fee that was waived by the Distributor or its agents, if any, and the actual fees received by the Distributor or its agents. The data is for the last three fiscal years.

<b>Year Ended</b>	<b>Plan Fees Accrued</b>	<b>Plan Fees Waived</b>	<b>Plan Fees Received</b>
November 30, 2017	\$0	\$0	\$0
November 30, 2016	\$0	\$0	\$0
November 30, 2015	\$0	\$0	\$0

**Table 3 – Administration Fees**

The following table shows the dollar amount of fees accrued with respect to the Fund, the amount of fees waived by Atlantic, if any, and the actual fees retained by Atlantic. The data is for the last three fiscal years.

<b>Year Ended</b>	<b>Administration Fees Accrued</b>	<b>Administration Fees Waived</b>	<b>Administration Fees Received</b>
November 30, 2017	\$117,200	\$36,000	\$81,200
November 30, 2016	\$117,283	\$36,000	\$81,283
November 30, 2015	\$116,000	\$36,000	\$80,000

**Table 4 – Commissions**

The following table shows the aggregate brokerage commissions of the Fund. The data is for the last three fiscal years.

<b>Year Ended</b>	<b>Aggregate Brokerage Commissions (\$) Paid</b>	<b>Total Brokerage Commissions (\$) Paid to Affiliate of Fund, Adviser, Subadviser or Distributor</b>	<b>% of Brokerage Commissions Paid to Affiliate of Fund, Adviser, Subadviser or Distributor</b>	<b>% of Transactions Executed by Affiliate of Fund, Adviser, Subadviser or Distributor</b>
November 30, 2017	\$40,730	\$0	0%	0%
November 30, 2016	\$36,820	\$0	0%	0%
November 30, 2015	\$43,864	\$0	0%	0%

**Table 5 – Directed Brokerage**

The following table lists the Fund’s directed brokerage in return for research services, the amount of transactions so directed and the amount of commissions generated therefrom. The data is since commencement of operations through the period ended November 30, 2017.

<b>Amount Directed</b>	<b>Amount of Commissions Generated</b>
36,363,282	\$33,890
178,619,717	\$2,993
452,616	\$7

**Table 6 – Securities of Regular Brokers or Dealers**

The following table lists the Fund’s regular brokers and dealers whose securities (or the securities of the parent company) were acquired since commencement of operations and the aggregate value of the Fund’s holdings of those securities as of the most recent period ended November 30, 2017.

<b>Regular Broker or Dealer</b>	<b>Value of Securities Held</b>
None	N/A

**Table 7 – Control Persons and 5% Shareholders**

The following table lists as of March 5, 2018: (1) the shareholders who owned 25% or more of the outstanding shares of the applicable class and thus may be deemed to control the Fund; and (2) the persons who owned beneficially or of record 5% or more of the outstanding shares of the applicable class.

<b>Name and Address</b>	<b>% of Fund Class</b>

**Forum Funds II  
Shareholder Voting Policy**

As of June 13, 2013

**SECTION 1. BACKGROUND**

The Trust exercises its shareholder voting responsibilities as an investor in other issuers as a fiduciary, with the goal of maximizing the value of the Trust's and its shareholders' investments. This Policy details the Trust's policy with respect to shareholder voting.

**SECTION 2. ADVISER RESPONSIBILITIES**

(A) Delegation by Board. Each Fund has delegated to the Adviser the authority to vote as a shareholder of issuers whose securities are held in its portfolio. The Adviser shall maintain and the Board shall approve voting procedures related to the Adviser acting on behalf of the Fund in accordance with its fiduciary duties and the best interests of Fund shareholders.

(B) Delivery of Proxies. The Adviser is responsible for coordinating the delivery of proxies to be voted by the Custodian to the Adviser or to an agent of the Adviser selected by the Adviser to vote proxies with respect to which the Adviser has such discretion (a "Proxy Voting Service"). Upon request, the Adviser shall provide periodic reports to the Board as to the implementation and operation of its shareholder voting policies and procedures as they relate to the Trust.

(C) Conflicts of Interest. The Trust recognizes that under certain circumstances an Adviser or Proxy Voting Service may have a conflict of interest in voting on behalf of a Fund. A conflict of interest includes any circumstance when the Fund, the Adviser, the Distributor, the Proxy Voting Service or one or more of their Affiliated Persons (including officers, directors and employees) knowingly does business with, receives compensation from, or sits on the board of, a particular issuer or closely affiliated entity, and, therefore, may appear to have a conflict of interest between its own interests and the interests of Fund shareholders in how shares of that issuer are voted.

Each Adviser is responsible for maintaining procedures to identify and address material conflicts of interest and, when applicable, determine the adequacy of a Proxy Voting Service's procedures to identify and address material conflicts of interest.

(D) Voting Record. The Adviser shall be responsible for ensuring a voting record is maintained that includes all instances where the Fund was entitled to vote and will coordinate the annual delivery of such record to the Administrator for purposes of preparing the Trust's annual Form N-PX filing. The voting record shall include the following information required to be reported in Form N-PX:

- (1) The name of the issuer of the security;
- (2) The exchange ticker symbol of the security;
- (3) The CUSIP for the security;
- (4) The shareholder meeting date;
- (5) A brief identification of the matter voted on;
- (6) Whether the matter was proposed by the issuer or by a security holder;
- (7) Whether the Trust cast its vote on the matter;
- (8) How the Trust cast its vote (*e.g.*, for or against proposal, or abstain; for or withhold regarding election of directors); and
- (9) Whether the Trust cast its vote for or against management.

The Adviser shall also be responsible for ensuring information regarding how the Fund voted relating to portfolio securities during the twelve-month period ended June 30 is available on the Fund's website or other location consistent with disclosure in the Fund's registration statement.

**SECTION 3: ABSTENTION**

The Trust and an Adviser may abstain from shareholder voting in certain circumstances. Abstaining from voting may be appropriate if voting would be unduly burdensome or expensive, or otherwise not in the best interest of a Fund's shareholders.

**SECTION 4: BOARD REPORTING AND REVIEW**

(A) The Adviser shall submit its voting procedures to the Board for review and approval initially and at the next regularly scheduled meeting of the Board following any material change.

(B) The Adviser shall report to the Board, at least quarterly, whether any conflicts of interest arose while voting as an investor in other issuers and how such conflicts were handled.

## **APPENDIX D – ADVISER PROXY VOTING PROCEDURES**

---

CVR Portfolio Funds LLC

### **PROXY VOTING**

#### **A. General Proxy Voting Policies**

CVR understands and appreciates the importance of proxy voting. To the extent that CVR exercises discretion to vote the proxies of the Advisory Clients it manages, CVR will vote any such proxies in the best interests of Advisory Clients and Investors (as applicable) and in accordance with the procedures outlined below (as applicable).

#### **B. Proxy Voting Procedures**

(1) All proxies sent to Advisory Clients that are actually received by CVR (to vote on behalf of the Advisory Clients) will be provided to the Chief Compliance Officer. Certain separate account clients may elect, however, to be responsible for voting the proxies related to their account. The Chief Compliance Officer will coordinate with the Fund's custodian to ensure that CVR is receiving all notices related to proxy voting. In addition, the Chief Compliance Officer will coordinate with the Fund's custodian to ensure that the custodian automatically participates in any class actions on behalf of the Fund.

(2) The Chief Compliance Officer will generally adhere to the following procedures (subject to limited exception):

(a) A written record of each proxy received by CVR (on behalf of its Advisory Clients) will be kept in CVR's files;

(b) The Chief Compliance Officer will determine which of CVR's Advisory Clients hold the security to which the proxy relates;

(c) third party service providers, Broadridge and Glass Lewis & Company LLC, are authorized by the Company to handle the proxy voting procedures under specific instructions from the Company.

#### **C. Handling of Conflicts of Interest**

(1) To the extent there is a conflict of interest, the CCO and CIO will first determine whether there is a conflict of interest related to the proxy in question between CVR and its Advisory Clients. This examination will include (but will not be limited to) an evaluation of whether CVR (or any affiliate of CVR) has any relationship with the company (or an affiliate of the company) to which the proxy relates outside an investment in such company by an Advisory Client of CVR.

(2) If a conflict is identified and deemed "material", CVR will determine whether voting the proxy is in the best interests of affected Advisory Clients (which may include utilizing an independent third party to vote such proxies).

(3) With respect to material conflicts, CVR will determine whether it is appropriate to disclose the conflict to affected Advisory Clients and Investors and give Investors the opportunity to vote the proxies in question themselves except that, if the Advisory Client is subject to the requirements of the Employee Retirement Income Security Act of 1974, as amended ("ERISA"), and the investment management agreement between CVR and the ERISA Advisory Client reserves the right to vote proxies when CVR has determined that a material conflict exists that does affect its best judgment as a fiduciary to the ERISA Advisory Client, CVR will:

(a) Give the ERISA Advisory Client the opportunity to vote the proxies in question themselves; or

(b) Follow designated special proxy voting procedures related to voting proxies pursuant to the terms of the investment management agreement with any ERISA clients.

#### **D. Voting Guidelines**

(1) In the absence of specific voting guidelines mandated by a particular Advisory Client, CVR will endeavor to vote proxies, or in certain circumstances abstain from voting, in the best interests of each Advisory Client.

(2) Although voting certain proxies may be subject to the discretion of CVR, CVR is of the view that voting proxies in accordance with the following general guidelines, which shall be provided to the proxy third party service providers, is in the best interests of its Advisory Clients:

(a) CVR will generally vote in favor of routine corporate housekeeping proposals including, but not limited to, the following:

- (i) election of directors (where there are no related corporate governance issues);
- (ii) selection or reappointment of auditors; or
- (iii) increasing or reclassification of common stock.

(b) CVR will generally vote against proposals that:

- (i) make it more difficult to replace members of the issuer's board of directors or board of managers; and
- (ii) introduce unequal voting rights (although there may be regulatory reasons that would make such a proposal favorable to certain Advisory Clients of CVR).

(c) CVR will generally vote against proposals that make it more difficult for an issuer to be taken over by outsiders, and in favor of proposals to do the opposite.

(d) CVR will generally vote in favor of proposals by management or shareholders concerning various compensation and stock option plans that will act to make management and employee compensation more dependent on long-term stock price performance.

(e) CVR will generally vote against proposals to move the company to another state less favorable to shareholders' interests, or to restructure classes of stock in such a way as to benefit one class of shareholders at the expense of another, such as dual classes (A and B shares) of stock.

#### **E. Disclosure of Procedures**

Employees should note that a brief summary of these proxy voting procedures will be included in the Form ADV Part 2A and will be updated whenever these policies and procedures are updated. The Chief Compliance Officer will be responsible for sending a copy of CVR's Form ADV Part 2 to all existing Advisory Clients. Advisory Clients and Investors will also be provided with contact information as to how such Advisory Clients and Investors can obtain information about: (a) the details of CVR's procedures are (*i.e.*, a copy of these procedures); and (b) how CVR has voted proxies that are relevant to the affected Advisory Client or Investor.

#### **F. Record-Keeping Requirements**

The Chief Compliance Officer will be responsible for maintaining files relating to CVR's proxy voting procedures. Records will be maintained and preserved for five years from the end of the fiscal year during which the last entry was made on a record, with records for the first two years kept in the offices of CVR. Records of the following will be included in the files:

- (1) Copies of these proxy voting policies and procedures, and any amendments thereto;
- (2) A copy of each proxy statement that CVR actually receives, provided, however that CVR may rely on obtaining a copy of proxy statements from the SEC's EDGAR system for those proxy statements that are so available;
- (3) A record of each vote that CVR casts;
- (4) A copy of any document that CVR created that was material to making a decision how to vote the proxies, or memorializes that decision (if any); and

- (5) A copy of each written request for information on how CVR voted such Advisory Client's proxies and a copy of any written response to any request for information on how CVR voted proxies on behalf of Advisory Clients.
- (6) Any records necessary for Form N-PX filings as of June 30 each year.
