

CVR Quarterly Letter – Q1 2015

We hope our investors will find the following CVR Quarterly Letter informative. Your feedback is welcome at info@cvrfunds.com.

Important Information

Before investing in CVR Dynamic Allocation Fund you should carefully consider the Fund's investment objectives, risks, charges and expenses. This and other important information is contained in the Fund's prospectus, a copy of which may be obtained by calling (855) 328-7691 or by visiting the Fund's website at www.cvrfunds.com. Please read the prospectus carefully before investing.

AVERAGE ANNUAL TOTAL RETURNS (%)

	Q1 2015	YTD	1 Year	Since Inception 12/30/13

CVRVX	\$2,500	\$100

Returns represent past performance and do not guarantee future results. Investment return and share price will fluctuate with market conditions, and investors may have a gain or loss when shares are sold. Mutual fund performance changes over time and currently may be significantly lower than stated above. For the most recent month-end performance, please call 855-328-7691. *The Adviser has contractually agreed to waive fees and/or reimburse expenses until March 31, 2016.

CVR Quarterly Letter – Q1 2015

The CVR Dynamic Allocation Fund (“the Fund”) is rule-based and unemotional. Designed to participate in upward trending markets and to minimize losses in difficult markets, leading to the potential for an improved up/down capture ratio.

Q1 Commentary

The S&P 500 continued to exhibit significant volatility during the first quarter, finishing with a positive 0.95% return. The HFRX Equity Hedge Index returned 2.20% and the CVR Dynamic Allocation Fund was up 1.88% over the same period.

Perhaps the most notable observation from our models is that the Absolute Return strategy materially reduced fixed income exposure concurrent with the selloff across global fixed income markets during the month of February. The Defensive Equity strategy was the primary source of outperformance for the Fund during the quarter. Although the Fund maintained consistent exposure to equities during the quarter, our strategies are indicating a cautiously optimistic stance toward equities as we begin the second quarter.

We do not profess to know what the next quarter or year will bring, but we do believe that our process, which seeks to provide upside capture and downside protection, offers a unique return stream that should yield a better investment outcome.

CVR News & Announcements

After a winter marked by record setting snow and cold temperatures, we are pleased to report that spring has finally arrived in Boston! Remarkably, the harsh winter weather brought out the best of humanity as Bostonians rallied to help one another through snowdrifts, ice dams and shoveling off overloaded roofs at risk of collapsing. It was a character building winter if there ever was one!

The CVR Dynamic Allocation Fund remains available for purchase through Fidelity/NFS, Charles Schwab, TD Ameritrade, Pershing, Vanguard and Envestnet. The Fund may also be purchased by contacting customer service at 855-328-7691.

We recently posted our Q1 Fact Sheet to our website. Please don't hesitate to contact us with any questions. We are grateful to our investors for their confidence and support.

Sincerely,

Peter Higgins & Bill Monaghan

Risk Disclosure

All investing involves risk including the possible loss of principal. There can be no assurance the Fund will achieve its investment objectives. In addition to the general risks of investing, the Fund is subject to additional risks including commodities risk, derivatives risks, ETF risk, risks of foreign investing and model and data risks. Exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. Derivatives, such as options, futures and swaps, can be volatile, and a small investment in a derivative can have a large impact on the performance of the Fund as derivatives can result in losses in excess of the amount invested. Shares of an ETF may trade at a premium or discount to the net asset value of its portfolio securities. Foreign investments may be subject to additional risks, which include international trade, currency, political, regulatory and diplomatic risks, which may affect their value. Given the complexity of the investments and strategies of the Fund, the Adviser relies heavily on quantitative models and data supplied by third parties. Models and Data may prove to be incorrect or incomplete and expose the Fund to potential risks. Please see the prospectus for a complete discussion of the Fund's risks.

Standard Deviation is a measure of the dispersion of a set of data from its mean. Beta is the measure of a fund's relative volatility as compared to the S&P 500 Index. Beta attempts to measure the relative risk. A Beta rating above 1.0 indicates greater volatility than the market. A Beta rating below 1.0 indicates lower volatility than the market. **Sharpe Ratio** is a risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better the fund's historical risk adjusted performance. **R-Squared** is the measure of percentage movement of a fund compared to the S&P 500 Index. A high R-Squared (between 85 and 100) indicates the Fund's performance patterns have been in line with the Index. **The S&P 500 Total Return Index** is a market capitalization-weighted index of 500 large-capitalization stocks commonly used to represent the U.S. equity market. All returns reflect reinvested dividends and capital gains distributions. One cannot invest directly in an index. **Liquid Alternatives** are any nontraditional asset with potential economic value that would not be found in a standard investment portfolio and trades with daily liquidity.

The Fund is distributed by Foreside Fund Services, LLC
