

CVR Quarterly Letter – Q3 2015

We hope our investors will find the following CVR Quarterly Letter informative. Your feedback is welcome at info@cvrfunds.com.

Important Information

Before investing in CVR Dynamic Allocation Fund you should carefully consider the Fund's investment objectives, risks, charges and expenses. This and other important information is contained in the Fund's prospectus, a copy of which may be obtained by calling (855) 328-7691 or by visiting the Fund's website at www.cvrfunds.com. Please read the prospectus carefully before investing.

AVERAGE ANNUAL TOTAL RETURNS (%)

	Q3 2015	YTD	1 Year	Since Inception 12/30/13

Returns represent past performance and do not guarantee future results. Investment return and share price will fluctuate with market conditions, and investors may have a gain or loss when shares are sold. Mutual fund performance changes over time and currently may be significantly lower than stated above. For the most recent month-end performance, please call 855-328-7691. *The Adviser has contractually agreed to waive fees and/or reimburse expenses until March 31, 2016.

CVR Quarterly Letter – Q3 2015

The CVR Dynamic Allocation Fund (“the Fund”) is rule-based, unemotional and repeatable. Designed to participate in upward trending markets and to minimize losses in difficult markets, leading to the potential for an improved up/down capture ratio.

Q3 Commentary

A decline of over 11% in the S&P 500 over the course of six straight trading days in August set the tone for a difficult quarter for global equities. A marked pickup in volatility and Chinese government intervention to depreciate the renminbi were the primary catalysts. The S&P 500 lost -6.44% during the quarter, the HFRX Equity Hedge Index was down -5.37% and the CVR Dynamic Allocation Fund returned -9.55% over the same period.

Equity risk continued to increase during the third quarter and ultimately led to a reduction in equity exposure in favor of cash in the Defensive Equity sleeve of the Fund as fewer and fewer sectors offered attractive risk profiles. This is one mechanism that the fund incorporates to protect capital and sidestep the most severe drawdowns.

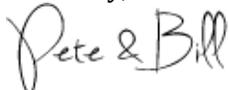

Underperformance in the Fund during the quarter was primarily attributable to the Focused Equity sleeve, which underperformed as did value strategies in general. Due to the concentrated nature of the Focused Equity sleeve, periods of underperformance (and outperformance) are not uncommon. Such periods offer valuation anomalies that provide us the opportunity to accumulate positions in companies that offer attractive valuations relative to the general market. We are confident that this process will lead to favorable long term results.

We do not profess to know what the next quarter or year will bring, but we do believe that our risk managed approach to equity investing offers a unique return stream that will yield a better investment outcome over the long term.

CVR News & Announcements

We are pleased to announce that Kevin Carroll has joined CVR as a partner. Kevin brings 23 years of investment industry experience to CVR, most recently as Senior Vice President at State Street Global Markets. Kevin demonstrated his confidence in our investment process as a day 1 investor and we are thrilled to have him supporting our growth efforts.

Sincerely,

Risk Disclosure

All investing involves risk including the possible loss of principal. There can be no assurance the Fund will achieve its investment objectives. In addition to the general risks of investing, the Fund is subject to additional risks including commodities risk, derivatives risks, ETF risk, risks of foreign investing and model and data risks. Exposure to the commodities markets may subject the Fund to greater volatility than investments in traditional securities. Derivatives, such as options, futures and swaps, can be volatile, and a small investment in a derivative can have a large impact on the performance of the Fund as derivatives can result in losses in excess of the amount invested. Shares of an ETF may trade at a premium or discount to the net asset value of its portfolio securities. Foreign investments may be subject to additional risks, which include international trade, currency, political, regulatory and diplomatic risks, which may affect their value. Given the complexity of the investments and strategies of the Fund, the Adviser relies heavily on quantitative models and data supplied by third parties. Models and Data may prove to be incorrect or incomplete and expose the Fund to potential risks. Please see the prospectus for a complete discussion of the Fund's risks.

Standard Deviation is a measure of the dispersion of a set of data from its mean. Beta is the measure of a fund's relative volatility as compared to the S&P 500 Index. Beta attempts to measure the relative risk. A Beta rating above 1.0 indicates greater volatility than the market. A Beta rating below 1.0 indicates lower volatility than the market. **Sharpe Ratio** is a risk-adjusted measure calculated by using standard deviation and excess return to determine reward per unit of risk. The higher the Sharpe ratio, the better the fund's historical risk adjusted performance. **R-Squared** is the measure of percentage movement of a fund compared to the S&P 500 Index. A high R-Squared (between 85 and 100) indicates the Fund's performance patterns have been in line with the Index. **The S&P 500 Total Return Index** is a market capitalization-weighted index of 500 large-capitalization stocks commonly used to represent the U.S. equity market. All returns reflect reinvested dividends and capital gains distributions. One cannot invest directly in an index. **Liquid Alternatives** are any nontraditional asset with potential economic value that would not be found in a standard investment portfolio and trades with daily liquidity.
